[Rupali Patel](#)

To advance the role as a Front-End Developer specializing in React.js, contributing to web development projects, and maintaining a commitment to ongoing skill enhancement and staying current with evolving technologies

Primary SKILLS

- ReactJS
- React Tools
- React Native
- JavaScript/ ES6
- Typescript
- Redux/Redux-Toolkit
- Redux-Saga
- HTML5/CSS3/SCSS
- Jest
- RESTful APIs
- Node.js
- Bootstrap
- JSON
- Flux
- Azure Fundamentals
- Unit Testing
- Sql , Mongo DB

Tools: Webpack, Enzyme, Git, Visual Studio Code

CORE COMPETENCIES

- User Interface Design
- Front-end Development
- Responsive Design
- Agile Methodologies
- Data Visualization
- Test-Driven Development
- Performance Optimization
- Cross-Browser Compatibility

EDUCATION

- Bachelor's Degree in Computer Science and Engineering from Babu Banarasi das University, Lucknow

LANGUAGES KNOWN

- English
- Hindi
- Urdu

PROFILE SUMMARY

- Dynamic React.js Developer with a Bachelor's degree in Computer Science and 4 years of experience in building high-performance web applications using ReactJS, React Native, and Redux Toolkit. Proficient in JavaScript, HTML/CSS, JSON, and REST APIs, I am dedicated to enhancing user experiences and delivering innovative solutions
- Worked as, a Software Engineer at GlobalLogic, a renowned digital Product Engineering company in India, to develop robust and scalable components for a Financial Budgeting app for Mobile and web both.
- Proficient in developing modern JavaScript-based web applications, with a strong understanding of advanced React concepts and expertise in React Testing Library.
- Conducted browser-based debugging and performance testing, utilizing tools such as Webpack and Enzyme to ensure application stability and speed.
- In-depth knowledge of JavaScript frameworks ,ES6 and libraries, particularly React, with practical experience in implementing RESTful APIs effectively. Strong foundation in Object-Oriented Programming principles and methodologies and Data Structures .
- Collaborate effectively with management, internal teams, and development partners to ensure the successful design and implementation of software applications
- Skilled in writing comprehensive unit, integration, and end-user automation tests to ensure code quality and reliability.
- Well-versed in Agile practices, with a background in contributing as a developer within cross-functional agile teams.

PROFESSIONAL EXPERIENCE

Jul'21-Oct'23 | Software Engineer |GlobalLogic

Key Result Areas:

- Spearheaded the development of highly resilient and scalable components for a cutting-edge Financial Budgeting app, leveraging the power of ,ReactJS, Redux Toolkit, and
- Successfully integrated frontend component with backend services. Understand backend logic and debug the code.
- Implemented state management solutions using Redux and Flux to enhance application architecture.
- Executed performance testing using Mocha and Jest, identifying bottlenecks and improving load times by up to 90% .
- Experience in working with databases like MongoDB.
- Worked with JSON and Rest APIs.
- Successfully integrated Redux Toolkit for seamless state management and leveraged the capabilities of D3.js Library to create visually compelling data visualizations through Graphs and bar charts.

Highlights:

- Conducted browser-based debugging and performance testing, utilizing tools such as Webpack and Enzyme to ensure application stability and speed.

Jan'21-Jun'21 | Front-end Developer| GISASS India

Key Result Areas:

- Designed, developed, and implemented software applications for a website, focusing on user interface design and utilizing industry-leading technologies
- Troubleshoot issues across the development lifecycle, delivering timely solutions and improvements.
- Developed reusable and reliable code for distributed cloud environments, optimizing performance and scalability
- Collaborated with project management on database development timelines, ensuring timely delivery of projects

Apr’20-Dec’20 | Front-End Developer| OneCorp (Rozgaar India)

Key Result Areas:

- Created responsive designs and reusable components using React Native for the Rozgaar India mobile App
- Developed, tested, and deployed design features in a timely manner, achieving a balance between functional and aesthetic designs
- Implemented the download feature for files in both PDF and JPG formats, enhancing the user experience and functionality of the app
- Collaborated with cross-functional teams to ensure seamless integration of APIs and data visualization through Graphs using a Graph Library

Feb’19-Dec’19 | Front-End Developer| Gisass India

Key Result Areas:

- Developed, tested, and deployed design features in a timely manner, achieving a balance between functional and aesthetic designs
- Created UI with reusable components and implemented API for data on UI.
- Successfully designed Android and IOS application using React Native.
- Created Backend API’s and connect front end with backend.
- Collaborated with cross-functional teams to ensure seamless integration of APIs and data visualization through Graphs using a Graph Library
-

ANNEXURE

Project Title 1- Financial Budgeting App

- Designed and engineered resilient and scalable modules for a financial budgeting application, featuring state management implemented via Redux Toolkit, and leveraging the C3.js Library for data visualization with graphs and bar charts
- Spearheaded performance and stability enhancements of the application by employing React Testing Library and Jest Enzyme, resulting in optimized user experience

Project Title 2- Policy Management App

- Orchestrated the retrieval of asynchronous data on a per-page basis to ensure a seamless user experience
- Proficiently collected coordinates and data associated with shapes drawn through a range of front-end events
- Collaborated on nested forms and CRUD (Create, Read, Update, Delete) functionality, utilizing scalable components and employing state management via Redux Toolkit
- Successfully integrated external APIs and managed JSON data to enhance application functionality

Project Title 3- Rozgaar India

- Engineered reusable and scalable components to enhance the Rozgaar India Web and Mobile App
- Successfully introduced a file download feature supporting both JPG and PDF formats
- Seamlessly integrated APIs to enhance app functionality
- Accomplished data visualization by implementing graph displays with a dedicated Graph Library
