WORK EXPERIENCE

FRONTEND DEVELOPER

Hanumant Technology Pvt. Ltd.

2023

- Engaged in an intensive 10-month MERN Stack Learning Program at the outset of employment, facilitated by dedicated trainers.

Risecore Technologies Pvt. Ltd.

27-05-2024-Present

- Developed and maintained responsive and user-friendly web applications using HTML, CSS, JavaScript, and frameworks like React,Tailwind css ,Bootstrap.

PERSONAL PROJECTS

Build an E-Commerce web application with vanilla JavaScript, local storage and API handling

- It is a Javascript based project .
- In this project, we're building an e-commerce web application entirely with vanilla JavaScript, leveraging local storage for client-side data management and handling API calls for server communication. By using vanilla JavaScript, we maintain full control over the frontend logic, ensuring a lightweight and efficient application. Local storage allows us to store user data locally, providing seamless persistence across sessions.
- Technology Used: -Vanilla JavaScript ,Local storage, API Handling, HTML5, CSS3

Implementing React Context API

- implementing the React Context API has been instrumental in creating a more efficient and scalable web application.
- Create Context: Initialize context with React.createContext().
- Provide Context: Wrap components with Provider and pass data using value.
- Consume Context: Access shared data using useContext hook or Consumer component.

Single Page Application using Tailwind CSS and React Router Dom

- Setting Up React Router Dom:** Install React Router Dom package. Define routes using < Route> components to render different components based on the URL.
- Styling with Tailwind CSS:** Install Tailwind CSS and configure it in your project. Apply Tailwind utility classes directly in JSX or create custom CSS components.
- Building Components:** Create React components for each page or section of your application. Use React Router's < Link> component for navigation between pages, ensuring that the application remains a single-page experience.
