Projects

RSG IT Solutions, Kurukshetra-

Software Engineer NOV 2019 - CURRENT

Walkan Token- Walkan Token is a peer-to-peer team crowdfunding system designed and developed **WalkanToken.com**, overseeing both the back-end and front-end development. The website is crafted to offer a seamless and intuitive user experience, with a strong focus on functionality and performance. The back-end infrastructure supports efficient management and scalability, ensuring the platform is well-equipped to handle its growing user base. By integrating advanced technologies and a user-friendly design, I ensured that WalkanToken.com delivers a reliable and engaging experience for its visitors.

Extronic World- Contributed to **ExtronicWorld.io** with a focus on front-end development, while also handling some back-end tasks. My role involved creating a visually appealing and user-friendly interface that enhances the overall user experience. I ensured that the website's design is both engaging and functional, with a responsive layout that adapts seamlessly to various devices. Additionally, I supported the back-end development to ensure smooth integration and functionality. By balancing aesthetics with performance, I contributed to making ExtronicWorld.io a dynamic and efficient platform.
