

Anjali Gupta

+91 9555437581 / guptaanjali90757@gmail.com / [LinkedIn](#) / [Github](#) / [Portfolio](#)

EDUCATION

• **Pranveer Singh Institute of Technology**, India

CGPA: 8.6

BTech (Information Technology), 2024

Courses: DataStructures(DSA), OperatingSystems, MachineLearning, DBMS, OOPS

WORK EXPERIENCE

• **KraftPixel Digital Solutions**, Web Engineer Trainee (HTML,CSS,JS & React)

- Developed dynamic and high-performance front-end components using HTML, CSS, JavaScript, and ReactJS.

- Leading a high-performing team of 3 members, driving impactful results for company projects.

• **BAOIAM Innovation Pvt. Ltd.**, Website Developer Intern (HTML and CSS)

- Designed and validated numerous responsive web pages, optimizing the user experience for the company.

- Excelled as a Website Tester(Usability Tester), contributing to the success of a core project.

PROJECTS

• **API Blog app** ([Github](#))

- Successfully worked on database connectivity (mongodb) with cloud and my application. I have successfully made connections with the cloud database using mongodb.

- API for a blog app featuring CRUD (Create-Read-Update-Delete) functionality.

- To eliminate confusion for API users when an error occurs, we should handle errors gracefully and return HTTP response codes that indicate what kind of error occurred

• **Crime Detection Application** ([Github](#))

- Successfully learned concepts of NLP , Machine Learning , Deep Learning.

- With the help of this project user will despite of sitting in front of live recording of camera , our application will report suspicious behavior to authorities.

- It allows users to receive real-time alerts about criminal activities.

- This includes possible patterns used by criminals in different situations, which could connect all of the crimes to one person.

• **Express API Project- including Routing**

- Successfully learned about routing request and response and worked on that.

- I have used Express.js , Node.js , mongodb for routing. I have successfully manage posts and comments as well as go through the registration and logging user process using a JWT token.

- A Blog REST API with JWT authentication using ExpressJS , MongoDB , NodeJS.

TECHNICAL SKILLS

• Languages: C/C++(Proficient), Python, SQL.

• Full Stack Development : HTML, CSS, Javascript, ExpressJS, NodeJS, ReactJS

• Database: Mysql, Postgres, MongoDB

• Data Science: NLTK, NLP, Standard ML Algorithms, Neural Networks

• Data Analysis: Numpy, Pandas, Matplotlib

• DeveloperTools: IntelliJ, VSCode, Git, Dockers, AWS, CICD

HONORS AND AWARDS

• 200 plus questions on leetcode(Handle : anjali2110)

• 5 star in hackerrank problem solving(Handle:Anjali Gupta)

• 300 plus score on geeks for geeks(Handle : guptaanjali90757)

• Full stack web development certificate ([Click Here](#))
