SUMMARY

- **Software developer with 6 months of internship** experience as a **Java Full Stack Developer**, where I worked on a **real estate web application** enabling admin to post properties for sale, rent, and PG accommodations. Implemented multi-role authentication functionality and additional features to enhance user experience. Proficient in **Java, Spring Boot, React, and MySQL**, with strong verbal communication skills in English.
 - Excels in building reliable backend systems and engaging frontends. Focused on improving performance, maintaining clean structure, and ensuring high code quality. Passionate about automation, continuous improvement, and contributing to innovative projects in a team setting.
-

TECHNICAL SKILLS

- **Backend Development:** Java8, Spring Boot, Microservices, Kafka (Topics, Brokers, Producers, Consumer), OOPs, Restful APIs, ORM, JPA, Spring Security, JWT Authentication
 - **Databases:** SQL, MySQL
 - **Frontend Development:** React, HTML, CSS
 - **Tools & Version Control:** Git, GitHub, Postman
-

WORK EXPERIENCE (Internship)

Java Full Stack Developer

Novagenix Lab Pvt. Ltd., Balasore — **Oct 2024 – March 2025**

- Worked on a **Real estate web** application for posting properties for sale, rent and PG.
 - Gained practical experience in **full-stack development**, improved problem-solving and coding skills, and learned to work on real-world projects with multi-role functionality.
 - Implemented full-stack functionality with **Spring Boot, React**, and **PostgreSQL**, covering property listings, search filters, and user profiles.
-

PROJECTS

Antisense – E-Commerce Platform [↗](#)

- Antisense, a full-stack e-commerce platform for selling customized gifts and handcrafts.
- Implemented an **AI Chabot** to provide faster and more accurate information about available products.
- Implemented features like product customization, inventory management, and seamless order processing.
- Built using Spring Boot, React JS, Git, and MySQL for a responsive, scalable, and user-friendly experience.

Chat Application – Kafka [↗](#)

- A real-time chat application for connecting and chatting with random people.
- Features include sending text, images, and emojis through chat.
- Built using SpringBoot and Microservices, with Kafka **Topics, Brokers, Producers** and Consumer for handling large volumes of data and WebSocket for real-time communication.

Contact Manager – Microservices [↗](#)

- Created a Contact Manager application using microservices. Logged-in users can manage their contacts.
 - Built a secure, scalable contact management with microservices for easy feature addition and scaling.
 - A MySQL database, Eureka Discovery Server, API Gateway, load balancer, RestTemplate, FeignClient.
-

EDUCATION

- Bachelor of Technology | Srinix College of Engineering | 2025 | CGPA: 8.4
 - 12th Grade (CHSE Board) | Vikas Sadan H.S. School | 2021 | Score: 80%
-

CERTIFICATIONS

- **Java full stack developer Internship**
 - **CSS Certification**
-

SOFT SKILLS

- Strong problem-solving and analytical skills & Good Communication & Teamwork skills
