SUMMARY

Enthusiastic and skilled Node.js developer with over 1 year and 3 months of experience in developing, implementing, testing, and maintaining scalable web applications. Adept at collaborating with cross-functional teams to drive project success. Proven expertise in leveraging Node.js to deliver high-performance and robust solutions.

SKILLS

- **Programming Languages:** JavaScript
- **Web Technologies:** NodeJs, Express.js, RESTful APIs, React
- **Database Systems:** MongoDB
- **Version Control:** Git,Github,BitBucket
- **Tools:** npm
- **Collaboration:** Jira

EDUCATION

Graduation

Bachelor of Technology(B.Tech) – Information Technology
C.S.J.M University - Kalyanpur, Kanpur – 208024
Passing year - 2020
CGPI – 6.58

Intermediate

St. Xavier's Public School ,Gorakhpur Uttar Pradesh
Passing year - 2014
Score – 89.8%

High School

M.G.Inter College, Gorakhpur Uttar Pradesh
Passing year - 2012
Score – 86.67%

Languages

English, Hindi

Hobbies

Travelling, Cooking, Cricket

WORK EXPERIENCE

DLTLabs Technologies Private Limited

Software Engineer (BackEnd NodeJs) – (Noida ,India)

22 November 2021 to 13 February 2023

- Developed and maintained server-side logic using Node.js for web applications.
- Implemented RESTful APIs for seamless communication between front-end and back-end systems.
- Utilized Express.js to build efficient and scalable server-side applications.
- Collaborated with the QA team to identify and resolve bugs and issues.
- Participated in code reviews to ensure code quality and adherence to best practices.

Projects

Asset Track

One of largest blockchain-based freight and payment network application. As part of this project I worked on backend side utilising NodeJS and Express as follows:-

- Adding new features to the application using NodeJs,Express and MongoDB.
- Optimized database queries to enhance overall system performance.
- Implementation of modules like pm2 and cluster along with Integration of tools like elastic-apm
- Bug fixing.
- Refactoring of codes.
- Writing Unit Test cases using Jest.

Tour website

Here is breakdown of the work performed on the backend side of tour website:-

- **User Authentication:** Implementing a secure authentication system for users to signup, login, and manage their accounts securely.
- **Database Management:** Designing and maintaining the database schema to store user data, tour packages, booking details, reviews, and other relevant information.
- **Security measures:** Implementing security measures such as HTTPS, encryption, input, validation, and protection against common web vulnerabilities.
- **Error Handling:** Implementing error handling mechanism to catch and handle exceptions and error gracefully.
