EXPERIENCE

CROPTR TECHNOLOGIES PRIVATE LIMITED | SOFTWARE DEVELOPER INTERN

Sep 2023 – Feb 2024 | Remote, India

- Developed and maintained backend APIs using NodeJS and ExpressJS.
- Worked with databases like MongoDB and MySQL to store and retrieve data for the application.
- Participated in team meetings and contributed ideas for improving the application's features and functionality.
- Utilized Git for version control and collaborated with team members using agile methodologies.
- Conducted code reviews and wrote unit tests to ensure code quality and functionality.
- Resolved bugs and errors by analyzing logs and debugging code.

PROJECTS

SCALEABLE CHAT-APP | NODEJS | NEXTJS | REDIS | POSTGRES | KAFKA | TYPESCRIPT

2023

- This is the basic chat application only for texting right now. Utilize Express for building the server with socket.io using WebSocket protocol. Use Authentication functionality using jsonwebtoken. Use Redis Pub/Sub for handling real-time messaging. Use Apache Kafka for handling throughput and large volumes of messages.
- Overall, If Someone is connect to the chat using different server it can be message by redis pub/sub. Use Avien Software for free redis, kafka and postgres services.

STORE LOCATOR | NODEJS | MONGODB | EJS

2023

- The application provides a RESTful API that allows users to locate store locations by entering their current location or address. The API uses the MapQuest API to get the Geolocation data of the entered address or current location. The application stores the store location data in the MongoDB database, including the store ID, name, address, latitude, and longitude.
- Overall, the Store Locator project on Node.js Express provides an efficient and user-friendly way to locate store locations using Geolocation data and displays the store location on Google Maps.

CAREERPATH (JOB PORTAL) | REACT | NODE | MONGODB

2023

- Build a Job Portal (CareerPath) using tech Stack React Js, Node Js, MongoDB. This job portal is user friendly responsive webpage with material UI. Use Node Js framework Express Js for build Rest apis for do all operations like create jobs, delete jobs, update jobs by admin.
- Use jwtwebtoken for authentication and bcrypt for password encryption. All features of login, register and admin dashboard. Use mongoDB to store data.

SKILLS

PROGRAMMING

Proficient:

- Java • JavaScript • MongoDB
- MYSQL

LIBRARIES/Frameworks

- Node • React • Redis • NextJs • TypeScript

TOOLS/PLATFORMS

- Git • Linux • VsCode

DEVOPS/CLOUD

- Aws • Docker • Nginx

EDUCATION

BANARAS HINDU UNIVERSITY

MASTER'S OF COMPUTER APPLICATION

Jun 2021 - Jun 2023 | UP, India

Computer Science

Cum. GPA: 8.1 / 10.0

INDIRA GANDHI NATIONAL OPEN UNIVERSITY

BACHELOR'S OF COMPUTER APPLICATION

July 2017 - Jun 2020 | New Delhi, India

Computer Science

Cum. Percentage: 68.12 / 100

COURSEWORK

POST GRADUATE

- Data Structure | Algorithms
- Database Management System
- Machine Learning
- Artificial Intelligence
- Object Oriented Programming

CERTIFICATIONS

- Cloud Computing and Distribution System
- Ethical Hacking
