- Managed and mentored team to deliver exceptional service
- Optimized team training and staff development.
- Developed sales strategies to increase market share of existing products and services.
- Identified and developed relationships with potential clients to generate new business opportunities.

PROJECT & TRAININGS

Core and Advance JAVA Internship (Offline)

Nov/2019 – Mar/2020

Training: I this whole internship I have learned core and advance concept of java using object-oriented programming and then I have learned application development using Java (Swing). And I made a real-world project called G.I.C School app.

Project: It's a school management app where you get two panels one User/Admin. In User Panel we can submit student details and staff details like their fees, salary, and many more. Other side Admin panel is for the admin who have access to read or write student or staff details from anywhere because it's totally online application.

PHP Web Development (Online)

Dec/2020 – May/2022

Training: In this six-month program I've learned many technologies like HTML, CSS, JavaScript, jQuery, Bootstrap, Ajax, MySQL, PHP. By using all these I made few projects which I've mentioned.

Project:

Online QR Generator

Gaming Tournament Portal

Restaurant Management System
