AKASH SRIVASTAVA

OBJECTIVE

Seeking a challenging role as a Python/Django Developer in the microfinance or fintech domain, where I can leverage my technical expertise, problem-solving skills, and passion for automation to develop innovative financial solutions and enhance business operations

SUMMARY

Results-driven Web Developer with 2+ years of experience in designing, developing, and deploying scalable web applications. Proficient in Python, Django, JavaScript, SQL, and skilled in API integration, database management, and process automation to enhance system efficiency.

Worked on microfinance and fintech projects, including HRMS Job Portal, Credfix (OTS Loan Settlement), Sarthi (Collection Management), Cyber Quiz (Cybersecurity Awareness), and Phishing Mail Simulation. These projects have automated workflows, improved security, and optimized financial operations.

Carrer Focus: Aiming to become a technology leader by mastering full-stack development and building secure, innovative solutions for financial and business automation.

EXPERIENCE

Web Developer with Python and Django Technology

Sonata Finance Private Limited, Lucknow

September 2022 - Present,

Experience Summary;

- Experienced in developing fintech and microfinance applications using Python, Django, and SQL.
- Worked on 4 major projects:
 1. HRMS Job Portal – Designed and developed a web-based Human Resource Management System for job posting, interview scheduling, offer letter generation, and e-signing integration.
 2. Credfix (One-Time Settlement System) – Built a platform for managing customer One-Time Settlements (OTS), enabling streamlined negotiation and settlement processing.
 3. Cyber Quiz Website – Created an interactive quiz platform focused on cybersecurity awareness, with automated scoring and result analysis.
 4. Phishing Mail Detection System – Worked on an email security tool to detect and prevent phishing attacks by analyzing suspicious email patterns.
- Integrated RESTful APIs, managed databases, and optimized application performance.
- Collaborated with cross-functional teams to develop scalable solutions that enhance business processes.

Experience Summary:

- Have been working on Microsoft Word, Excel, and Outlook Express as a part of my daily work.
- Expertise in managing multi calls at a time and to provide best resolution to the queries and putting Account entries call only with having documentation and filing ready.
- Region wise report to be prepared and sent to the region head on the liability growth movement across saving account, current account, Term Loan, Assets and Credit card etc.

PROJECTS

HRMS Job Portal

Sonata Finance Private Limited

September 2023 - February 2024

Developed a comprehensive HRMS Job Portal to streamline recruitment, integrating multiple advanced features. The portal allows HR to post vacancies, manage applications, and schedule interviews with automated email notifications. Integrated dynamic document generation for offer letters, replacing placeholders with database values, followed by e-signing via Sign Desk API. Implemented Aadhaar-based candidate verification, storing responses and profile images in binary format. Added biometric authentication using a MANTRA MFS110 device for secure candidate verification. Designed an online test module with automated question generation from uploaded documents, enabling real-time candidate evaluation. The portal efficiently coordinates HR tasks, enhancing the recruitment process from vacancy creation to final onboarding, ensuring a seamless experience for both HR teams and candidates.

Credfix - One-Time Settlement (OTS) for Write-Off Customers

Sonata Finance Private Limited

October 2024 - Present

Credfix is a loan settlement platform designed to facilitate One-Time Settlement (OTS) for written-off customers, preventing a negative impact on their credit score. It streamlines settlement approvals, batch creation, and collections while offering multiple payment options.

Key Features:

- **Batch Creation & Customer Management:**
- **Branch Managers** create batches of customers with multiple written-off loans.
- **Approval Workflow:**
 - Nodal Officers review and approve settlement requests before processing.
- **Loan Collection & Payment:**
 - Loan Collection Officers visit customers to finalize settlements.
 - Payments can be made via digital payments or cash transactions.
- **Automation & Digitalization:**
 - Automated settlement tracking & reporting ensures transparency
 - Integration with financial databases for customer validation

Phishing Mail Awareness Simulation

Sonata Finance Private Limited

November 2024 – November 2024

Phishing Mail Awareness is a cybersecurity training project designed to test and educate employees on phishing attack prevention. It simulates real-world phishing attempts by sending deceptive emails and analyzing user responses to enhance awareness.

Key Features:

- **Realistic Phishing Simulation:**
 - Sent a fake email mimicking HRMS password reset requests.
 - Users clicking the malicious link received a warning message simulating a security breach.
- **Employee Awareness & Training:**
 - Educated employees on the risks of phishing attacks.
 - Helped employees recognize suspicious emails and links.

- Performance Tracking & Reporting:
- Monitored how many users clicked the phishing link.
- Generated reports on employee vulnerability levels.

Cyber Quiz – Cybersecurity Awareness Platform

Sonata Finance Private Limited

December 2024 – December 2024

Cyber Quiz is a web-based cybersecurity awareness platform designed to educate company employees on best practices for protecting sensitive data. The platform features interactive quizzes covering key cybersecurity threats, helping employees recognize and prevent potential cyber-attacks.

Key Features:

- Three Cybersecurity Quiz Categories:
 1. Email Security: Identifying phishing emails and securing email communications.
 2. Password Safety: Understanding strong password policies and multi-factor authentication.
 3. Malicious Links Awareness: Recognizing suspicious links to prevent social engineering attacks.
- Employee Training & Awareness:
 1. Designed for company employees to enhance cybersecurity knowledge.
 2. Real-world scenarios & simulations for better engagement.
 3. Scoring & Reporting:
 4. Employees receive instant feedback on quiz performance.
 5. Reports help identify areas needing improvement.
