- I Completed **Full Stack Web Development Course** from **Newton School** along with my graduation during final year from 10th January to 10th June 2021.

Professional Projects:

Project #1	IndusInd Bank
Environment	HTML, CSS, JavaScript, PWA React.Js, Redux Tool Kit, MUI
Role	Front End Developer
Duration	11 Months

Description:

The project I worked on belongs to the banking sector and specifically focuses on a Progressive Web Application (PWA). The unique aspect of this application is that it can be used seamlessly without relying on traditional app stores, mimicking the experience of native apps. Additionally, some of its features are designed to be accessible even when offline.

To accommodate different devices, like mobile and desktop view. Various form-based components played a significant role capturing essential information from users, such as Aadhar, PAN, mobile numbers, and OTP authentication. Security measures, such as encryption and decryption, Additionally, the project utilized features like stepper and progress bars to guide users through the application journey, ensuring a clear understanding of the progress made.

The primary focus of the project was on developing vehicle loan functionalities for both existing bank customers and those new to the bank such as:

- New Car Loan
- Used Car Loan
- New Bike Loan
- Pre-approved & aggregator journey.

Contributions:

- There are also 2 Module like Customer Application and Admin Module.
- We are total 5 Member in the team and my role is Frontend like developing UI according to design and after in that page API Integration.
- We also did Unit Testing of each module for all screen/page.
- And for better UI we used Material UI Framework.

Project #2	HOABL
Environment	HTML, CSS, Typescript, React.js, Redux, Formik
Role	Front End Developer
Duration	7 Months

Description: I had the opportunity to contribute to a real estate project called HOABL. My primary focus was on the development of the Admin Module. This module empowered the administrators to have complete control over the website's features and functionality, particularly in managing content changes. With this module, administrators could easily customize elements such as:

- **Page Management** – In this module admin/super admin can create multiple pages for describe their plot information in forms pages

- **Marketing Management** - This module controls like updates, testimonials, promises over the customer web application.
- **Project Management** –This module controls whatever project/plots uploaded by user and all details will be managed.
- **Customer Management** –This module controls customer list of data and view user's details and action it.
- **User Management** –In this module admin can invite to access logs and users' details.

Contributions:

- There are 5-6 Modules in Admin Portal.
- We are total 5 Members in the team and my role is Frontend like developing UI according to design and after in that page API Integration.
- We also did Unit Testing of each module for all screen/page.
- And for better UI we used Material UI framework.

Project #3	Author Tool , Analytics (Product)
Environment	ReactJs, NextJs, Redux, Tailwind CSS, Antd.
Role	Front End Developer
Duration	6 Months

Description: I Developed Author tool where authors will create their account and create a school which can create blogs like ads monetize that blog and also that developed reader side that customer read blogs and ads will appear there,

I developed Analytics dashboard where admin can see all product details and its profits and losses by graph representation.

such as:

Blogs– User can create blogs and publish for customers readers.

Newsletter –user can create newsletter to show customer on homepage like highlights.

Profile – Here user can edit profile and show their blogs analytics.

Monetize – Here user can monetize their blogs on public reading blogs on <https://zebralearn.com/> platform.

Co- Curricular Activities

- Participation in Cloud Computing Workshop conducted in AIMT, Lucknow.
- Participated in Volleyball-2018 at Annual Sports day in the College.
- Participated in the Seminar on Java programming held in college AIMT, Lucknow.
