PROFESSIONAL SUMMARY

Results-driven IT professional with **8+ years of experience** in the IT and Telecom sectors, specializing in software testing. I have 6 years of expertise in quality assurance and 4 years in **automation testing** using **Selenium** with the **TestNG, POM** framework. Proficient in manual and automation testing, with strong skills in **API Testing, database testing, performance testing, and penetration testing** within **Agile development** environments. Experienced in testing web-based and mobile applications, I am committed to ensuring high-quality deliverables and optimizing testing processes through effective collaboration within cross-functional teams.

PROFESSIONAL EXPERIENCE

GEDU SERVICES PVT. LTD., QA Analyst

January 2024 – present | Noida

STIGEN MARTECH PVT. LTD., QA Analyst

November 2023 – December 2023 | Gurgaon

CARNATION INFOTECH PVT LTD., Software Developer

November 2021 – October 2023 | Lucknow

KESKINTECH SERVICES PVT LTD., Jr. Software Test Engineer

July 2019 – October 2021 | Delhi

RAILTEL CORPORATION OF INDIA LIMITED, Computer Instructor

October 2013 – December 2015 | Lucknow

CERTIFICATES

JIRA Fundamentals

Atlassian

Confluence Fundamentals

PROJECTS

MetaApply

January 2024 – present

MetaApply is a cutting-edge platform that bridges recruitment partners with top-tier institutions globally, unlocking a vast array of opportunities across the international education landscape. On the institutional side, MetaApply empowers universities to seamlessly connect with a vetted network of recruiters, gaining access to a broad and diverse pool of qualified student prospects worldwide.

From a technical standpoint, MetaApply has undergone a significant digital transformation, migrating from a legacy monolithic architecture to a scalable, service-oriented architecture built on the **.NET Framework using microservices**. This modernization enhances system performance, maintainability, and deployment agility.

EDUCATION

M.Tech, Sri Ramswaroop Memorial University

2015 – 2018 | Lucknow

Computer Science Engineering

MCA, Integral University

2010 – 2012 | Lucknow

BCA, Integral University

2007 – 2010 | Lucknow

We leverage **Azure DevOps Services** for a robust **CI/CD pipeline**, ensuring rapid and reliable deployment across multiple environments. Our development lifecycle is streamlined with **Azure Boards** for agile planning and work item tracking. For secure and scalable data storage, we utilize **Azure Blob Storage**, while **Azure Key Vault** safeguards sensitive configuration data and credentials with enterprise-grade security.

These technologies collectively ensure that MetaApply is not only a strategic enabler for educational recruitment but also a reliable, secure, and high-performance platform aligned with modern cloud-native standards.

Job Description:

- **Designed a hybrid automation framework** integrating **TestNG**, **Page Object Model (POM)**, **Extent Reports**, and the **Singleton design pattern**, significantly improving modularity, maintainability, and reporting capabilities.
- **Developed and maintained regression test suites**, integrating them into the **CI/CD pipeline** to enable smooth and continuous delivery of automated test executions.
- **Conducted functional testing** using both **automated** and **manual testing methodologies**, ensuring thorough validation across different test phases.
- Prepared and executed detailed **test scripts** and **test cases**, aligning them with business requirements and quality objectives.
- Collaborated with cross-functional teams to define test requirements, identify scenarios, and develop **automated test scripts** using **Selenium WebDriver** and **TestNG**.
- Utilized **Singleton classes**, **Factory classes**, and **utility methods** to streamline automation workflows and maintain consistency across the framework.
- Performed **non-functional testing** such as **performance testing** using **JMeter** and basic **vulnerability testing** using **Burp Suite** (e.g., SQL injection).
- Conducted **automated regression testing** to verify that previous issues were resolved and no new defects were introduced during enhancements.
- Executed **database testing** and **API testing**, ensuring data integrity and seamless integration with backend services.
- **Actively followed Agile methodology**, participating in **sprint planning**, **daily stand-ups**, **retrospectives**, and **backlog grooming** with business analysts and stakeholders.
- Collaborated closely with the development team during **closure activities**, ensuring smooth hand-offs and issue resolution.

Wipro Vesta, e-Commerce

November 2023 – December 2023

Wipro Vesta is an e-commerce web-based application. It deals in Home appliances.

Job Description:

- Conducted functional testing through both automation and manual testing.
- Prepared and executed test scripts and test cases.
- Performed functional testing, database testing, and API testing.

CITI Program (LMS3)

November 2021 – October 2023

CITI Program, based in the United States, has been offering global training for over two decades in ethics, research, and regulatory compliance. It partnered with 2500+ organizations including universities and institutions. I worked on migrating its legacy LMS2 project from ColdFusion to a modern web-based application using the .NET framework.

Job Description:

- **Developed and maintained robust automated test scripts** for the **regression test suite** using **Selenium WebDriver**, **TestNG**, and **Page Object Model (POM)** to ensure high test coverage and maintainability.
- **Executed automated test cases** and **generated detailed test reports** using **Extent Reports**, leveraging **Singleton design pattern**, **Factory classes**, and **utility classes** to promote reusable and streamlined test code.
- **Implemented and managed a structured automation framework** using **TestNG** and **POM**, contributing to consistent and efficient test executions across releases.
- **Collaborated with development teams and business analysts** to gather and analyze project requirements, supporting the creation of **detailed test plans** and **automated scripts** tailored to business needs.
- Performed **automation testing** by executing scripts to detect software defects, ensuring product quality and adherence to functional specifications.
- Documented and reported defects using **bug-tracking tools (e.g., JIRA)** with comprehensive logs and reproduction steps, facilitating timely issue resolution.
- Conducted thorough **regression testing** to verify the resolution of known issues and validate that new changes didn't introduce additional defects.
- Managed **test data** and configured appropriate **test environments** to ensure reliable and effective execution of test cases.
- Engaged in **exploratory and ad hoc testing** to identify hidden or unanticipated issues not covered by scripted test cases.
- **Participated actively in Agile ceremonies** including **sprint planning**, **daily stand-ups**, **retrospectives**, and **backlog grooming** sessions with stakeholders and business analysts.

Give Charity

November 2021 – October 2023

Give Charity is a crowdfunding platform that directly connects donors and service providers on behalf of needy individuals. Invest operates this platform to Impact (ITOI) Network Foundation, a non-profit organization in the USA.

Job Description:

- Developed and executed **automation test scripts** using **Selenium WebDriver** and **TestNG**, enhancing testing efficiency and reducing manual effort.
- Performed **end-to-end, regression, smoke, and integration testing**, including both manual and automated approaches.
- Conducted **database testing** using **MySQL Workbench** to validate data integrity across environments.

- Conducted **requirement analysis** and translated them into clear, actionable **user stories**.
- Wrote, reviewed, and executed **test cases**, ensuring thorough test coverage and alignment with acceptance criteria.
- Logged and tracked **defects in JIRA**, assigning appropriate severity and working with developers to ensure timely resolution.
- Demonstrated new builds to clients during **daily stand-up calls**, incorporating feedback into test cycles.
- Collaborated closely with the **development team** throughout the **SDLC**, ensuring quality at every stage.
- Prepared **release documentation** to support production deployment.
- Generated **sprint reports using JIRA** to track testing progress and identify blockers.
- Actively participated in **retrospectives and backlog grooming** sessions to improve sprint outcomes.
- Engaged in **User Acceptance Testing (UAT)** with clients to confirm that deliverables met business expectations.

Seafarers

August 2019 – October 2021

Seafarer is a web-based and mobile-based application, It is a platform where seafarers can buy courses from different institutions. More than 200 Institutes are associated with Seafarers across the nation.

Job Description:

- Performed **manual testing** of web-based applications, including **regression testing, sanity testing, and retesting** to ensure issue resolution and application stability.
- Developed and executed detailed **manual test cases** based on business requirements for various applications to validate functionality and user experience.
- Conducted **requirement analysis** to ensure complete test coverage and traceability of test cases to business needs.
- Reported and prioritized bugs in **JIRA** to streamline issue tracking and resolution with the development team.
- Conducted **database testing** using **MySQL Workbench** to validate backend data consistency and integrity.
- Created and executed **automated test scripts** for the sanity suite to support quicker validation during early testing phases.

CSR (Corporate Social Responsibility)

October 2013 – December 2015

Railtel Corporation of India Ltd. (RCIL) is the Mini Ratan of the Central Government. RCIL is contributing to CSR projects to educate the people in rural areas by providing a computer network infrastructure

Job Description:

- Conducted the subject lectures regularly, kept an eye on the understanding of the students
- Carried out practical sessions with explanations about the purpose of the experiment and the procedures that follow to seek results
- Carried out debate sessions in regular classes to help students understand the subject better
- Coordinated project schedules, resources, equipment, and information.
