Lucknow, Uttar Pradesh, India

SUMMARY

Java backend developer transitioning from incident management to software development. Skilled in Spring Boot, REST APIs, microservices, and database design. Proficient in building scalable applications using Java, Docker, Git, and MySQL. Eager to contribute backend expertise in real-world projects and grow in a product-based development environment.

SKILLS

- **Programming Languages:** Java
- **Libraries and Frameworks:** Spring Boot, Spring MVC, Spring JPA, gRPC, Protobuf, Hibernate
- **Tools:** Git, Maven, Docker, AWS (EC2, S3), Linux, ServiceNow
- **Other Skills:** RESTful APIs, Microservices, MySQL, API Gateway, Data Structures and Algorithms, Low Level Design

EXPERIENCE

Scholar

📅 10/2023 - 02/2025

Scaler Academy

Specialized in Software Development and Problem Solving

- Developed a comprehensive digital and traditional illustration curriculum, leading to a 30% increase in student enrollment.
- Solved 500+ algorithmic problems with a 94% success rate, showcasing strong problem-solving and analytical skills.
- Ranked in the top 5% of learners, demonstrating a commitment to excellence and continuous learning.

Analyst

📅 02/2021 - 10/2023

HCLTech

- Coordinated responses to 370+ major IT incidents, demonstrating effective problem-solving and collaboration under high pressure.
- Led cross-functional teams, ensuring swift and efficient resolution during critical situations, adhering to Agile Methodologies.
- Integrated automated shift scheduling tools (SendWordNow), improving communication efficiency across project teams.
- Conducted root-cause analyses for critical incidents, providing strategic inputs for long-term system stability.
- Created comprehensive incident reports and detailed analyses, providing actionable insights to prevent recurring issues.
- **Transitioned from incident management to software developer** by completing Scaler's intensive course, acquiring expertise in Java, Spring Boot, and problem-solving.

PROJECTS

E-Commerce Application

🔗 <https://github.com/PacificK777/EcommerceApplication>

- Architected and integrated over 3 microservices to streamline user management, product cataloging, and payment processing, resulting in an enhanced user experience.
- Implemented Stripe, RazorPay payment gateway integrations and OAuth 2.0 authentication for secure transactions.
- Engineered an event-driven email service using Kafka for large scale real-time notifications.
- **Key Technologies:** Java, Spring Boot, JPA, Kafka, Microservices.

Healthcare Microservices Platform

🔗 <https://github.com/PacificK777/patient-management>

- Architected a comprehensive healthcare system using microservices architecture with specialized services for patient management, authentication, billing, and analytics.
- Designed inter-service communication using both RESTful APIs and gRPC for efficient data exchange between components. Implemented containerized deployment with Docker for consistent operation across development and production environments.
- Built secure authentication flows with dedicated auth-service for protecting sensitive healthcare data.
- Utilized SQL databases for persistent storage and integrated data persistence across multiple services.
- **Key Technologies:** Java, Spring Boot, Microservices, Maven, SQL, gRPC, Protobuf, Docker.

ACHIEVEMENTS

- ITIL® Foundation Certificate in IT Service Management (PeopleCert-AXELOS)
- Received Star award for top technical contributions in 2022.
- Awarded the 2Good Award in HCL Achievers League 2023 for maintaining the highest team rating consistently over 2 years.

EDUCATION

Bachelor of Technology

📅 2019

Dr. M.C. Saxena Institute of Engineering and Management
