EXPERIENCE

- Tech Mahindra** Bangalore, India
Software Engineer Aug 2023 - Present
 - Spring Boot Development:** Developed and optimized Spring Boot microservices for backend application logic.
 - Database Management:** Worked on MySQL database queries for backend data processing and application enhancements.
 - Security Implementation:** Integrated Spring Security authentication mechanisms to strengthen API access control.
 - REST API Development:** Designed and implemented RESTful APIs for seamless data communication.
 - Cloud Deployment:** Collaborated with cross-functional teams to ensure efficient deployment of backend services on AWS.
 - Automation:** Automated routine backend tasks using Java and Bash scripting to improve efficiency.
- Baoiam Innovations Pvt Ltd** Remote
Web Developer Jan 2022 - March 2022
 - Portfolio Website:** Developed a responsive portfolio website using **React, HTML, and CSS**. Implemented sections like **About, Projects, and Contact**.
 - Navigation:** Used **React Router** for seamless navigation and ensured a **mobile-friendly** design.

PROJECTS

- Movie Booking Application**
Java, Spring Boot, MySQL, Postman
 - Project Goal:** Developed a Movie Booking Application that allows users to view available movies, select showtimes, and book tickets. The application includes an admin panel for managing movies and showtimes.
 - Features of the Application:** Features include user registration, movie browsing, ticket booking, admin movie management, and showtime scheduling. Payment processing and booking confirmation were also implemented.
 - Steps:** The project was broken down into the following steps: Database design, API development for movie listings and booking, user authentication, and testing with Postman.
 - End Points To Be Created:** Developed REST APIs for user registration, movie listing, booking tickets, and managing showtimes (CRUD operations).
 - Testing on Postman:** APIs were tested using Postman for verifying their functionality, including testing response status, data validation, and edge cases.
 - Special Instructions:** Followed guidelines for project submission, ensuring code quality and clean documentation for easy deployment.
 - Note:** Do's: Ensure all APIs follow proper validation rules; Don'ts: Avoid hardcoding values; Implement error handling for invalid user inputs.
- Smart Contact Manager**
Java, Spring Boot, Hibernate, MySQL, Postman
 - Comprehensive Contact Management:** Developed a full-stack application for users to add, edit, and manage contacts, including names, phone numbers, and profile pictures.
 - Secure Authentication:** Implemented user authentication with registration, login, logout, and profile management using Spring Security.
 - Feature Enhancements:** Added password reset via OTP-based email verification, pagination, and a dynamic search feature.
- Backend Blogging Application**
Java, Spring Boot, Hibernate, MySQL, Postman
 - RESTful API Development:** Built a backend system for handling blog posts, user profiles, and comment management.
 - CRUD Operations:** Designed APIs for creating, updating, deleting, and retrieving blog posts and comments.
 - Database Optimization:** Utilized Hibernate for efficient database operations with indexing and schema design.

SKILLS SUMMARY

- Programming Languages:** Java, SQL
- Backend Technologies:** Spring Boot, Hibernate, Spring, JDBC
- Databases:** MySQL, NoSQL
- Version Control:** Git, GitHub
- Soft Skills:** Problem-solving, Team collaboration, Analytical thinking, Effective communication

ACHIEVEMENTS

- Problem Solving:** Solved 500+ data structure and algorithm problems on platforms like GFG and Leetcode.
- Coding Contest Rating:** Achieved a rating of 1490 on GFG.

EDUCATION

- Babu Banarasi Das Northern India Institute of Technology** Lucknow, India
B.Tech in Computer Science and Engineering Aug 2019 - June 2023
 - GPA:** 8.67
 - Relevant Courses:** Operating Systems, Data Structures, Algorithms, Web Technology, Databases
