Experienced DevOps Engineer proficient in managing and optimizing

Professional Experience

Tata Consultancy Services Pvt Ltd

12/21 - 10/24

Azure DevOps Engineer

- 3 years of overall IT experience into Azure AWS Cloud.
- Experienced with SCM tool-GIT along with GitHub.
- Experienced in Azure Infrastructure provisioning and creation of NPRD, PRD environments as per designed target architecture through Terraform (init, plan, apply tasks) using Azure Release Pipelines.
- Experienced in creating Infra by integrating Terraform with Azure ARM.
- Creating templates in Azure and AWS DevOps using CI/CD Pipeline.
- Experienced in deploying .NET Applications to Azure App Services and AKS through Azure DevOps CI/CD Pipelines.
- Proficient in key AWS services, including EC2 for compute resources, S3 for object storage, and RDS for managed database.
- Experience with IAM for managing secure access policies and user roles.
- Utilized AWS CodePipeline and CodeDeploy for setting up CI/CD pipelines to automate deployment.
- Knowledge of AWS Lambda for serverless applications and CloudFormation for infrastructure as code.
- Familiar with security practices like VPC, Security Groups, and monitoring with CloudWatch.
- Knowledge in PowerShell scripting and Bash Scripting.
- Experienced on Azure DevOps by installing, configuring and maintaining for the purpose of Continuous integration (CI/CD) and for all build and deployments.
- Experienced in creating Docker Images using Docker file.
- Have Knowledge in Kubernetes clusters
- Good knowledge in SDLC.
- Have a good experience in direct client interaction.

Education

Guru Nanak Modern School (CBSE)

03/15

High School

Guru Nanak Modern School (CBSE)

04/17

Intermediate

Era University

08/18 - 08/21

BCA

Projects

GEICO

12/21 - 05/23

- Azure cloud automation, Azure cloud Automation, Creation and maintenance of CI/CD Azure Basic and YAML pipelines, Creating different Azure services by using Terraform on Azure DevOps.
- Engaged In the creation of CI/CD Pipeline for Azure Build & Release and
- Optimized applications by automating through azure pipelines.
- Creating different Azure services infrastructure by using Terraform through Azure DevOps.
- Maintained GIT repositories, creation of branches in GitHub, merging and creating pull requests.
- Designed CD pipelines for deploying the terraform scripts to deploy the infrastructure to different environments.
- Composed DevOps pipelines for automation, Shell scripting and Linux scripting and configured multiple

- stages and jobs using YAML.
- Configured Self-hosted agents for the azure pipelines and created service connections using serviceprinciples.
- Having strong working knowledge on Azure Virtual network, NSG, firewall, Private Endpoint, Private DNSzone, Key Vault, Storage account, container app, azure Kubernetes services, security policy.
- Implemented and managed Azure DevOps CI/CD pipelines for multiple projects, ensuring efficient and automated build, test, and deployment processes.
- Collaborated with cross-functional teams to design and deploy cloud-based infrastructure using Azure Resource Manager (ARM) templates, enabling seamless scalability and high availability.
- Leveraged Terraform and PowerShell scripts to automate infrastructure provisioning, reducing deployment time by 50% and increasing overall team productivity.
- Led troubleshooting and resolution of complex application and infrastructure issues, utilizing Azure monitoring and logging tools to ensure optimal performance and minimal downtime.

MetLife

05/23-10/24

- Created Azure infrastructure using Terraform, working with various Azure services
- Deployed Azure security policies using Infrastructure as Code (IaC)
- Experienced in Terraform Sentinel policies
- Utilized Azure Data Factory to convert files between different formats
- Utilized Power BI for data visualization
- Developed and implemented CI/CD pipelines utilizing Azure DevOps tools, resulting in an overall increase in software delivery efficiency by 30%.
- Collaborated with cross-functional teams to automate infrastructure deployment and configuration management processes, reducing manual effort by 40%.
- Led the migration of on-premises applications to Azure cloud platform, ensuring seamless integration and optimal performance.
- Managed and maintained Azure DevOps environment, including user access management, permissions, and security policies, resulting in a secure and highly stable development environment.
- Worked on jfrog to maintain the daily Terraform workspace record and used to visualise.

Certifications

- AZ-900: Microsoft Azure Fundamentals
- AZ-104: Microsoft Azure Administrator
- AZ-204: Azure Developer Associate
- AZ-500: Microsoft Azure Security Engineer Association

Key Skills

- Azure and AWS DevOps
- Azure Kubernetes services
- Terraform
- Sentinel policies
- Powershell
- GitHub
- Git
- Power BI
- Ansible
- Azure Security policies
