Training

SevenMentor PVT LTD Pune (MH)

17 July 2023 to till date Java Full Stack development

Projects Chronicle

1. Ecommerce Web app

Client : self
Role : Full Stack developer
Team Size : individual
Environment : Spring boot, JPA, Mail API, Bootstrap, Thymeleaf

Responsibilities:

- Setup Development environment
- Developed pages for login and dashboard and other pages using bootstrap
- Implemented JPA (Java Persistence API) for seamless integration with the database, facilitating efficient data management and retrieval operations.
- Integrated Java Mail API to enable automated email notifications for order confirmations, shipment updates, and promotional campaigns, enhancing customer engagement and retention.
- Implemented authentication and authorization mechanisms to ensure secure access control and protect sensitive user information

2. Educational Web app

Client : Training Project
Role : Backend developer
Team Size : 3
Environment : HTML, CSS, JavaScript, Bootstrap, Spring MVC, Spring JDBC

Responsibilities:

- Setup Development environment
- Admin Panel: including addition, editing, and updating of course details.
- Doubt Addressing System: Users can post doubts fostering a collaborative learning environment. Solutions to posted doubts can be provided by admin Like and dislike functionalities enable users to express satisfaction with solutions

3. Project Management System REST API

Client : self
Role : Backend developer
Team Size : individual
Environment : Core Java, Springboot, H2 database, swagger, postman

Responsibilities:

- Successfully created a Spring Boot project using Spring Initializr and integrated essential dependencies including Spring Web, Spring Data JPA, and H2 Database in the project's pom.xml file
- Integrated Swagger Documentation into the project by adding the necessary dependencies in the pom.xml file, enabling developers to easily explore and interact with API endpoints through a user-friendly interface provided by Swagger UI.
- Utilized Postman for API development and testing purposes, ensuring the reliability and functionality of RESTful endpoints across different HTTP methods.
