Examination	Institute	Year	CGPA/%
Graduation	Rajkiya Engineering College Kannauj	2020-2024	7.64/10.0
Intermediate/+2	Divine Public School, Akbarpur, Ambedkarnagar	2019	80.8%
Matriculation	RAV Public School, Ambedkarnagar	2017	10/10

Summary

Full-stack software developer with a strong focus on the **MERN stack (MongoDB, Express, React, Node.js)**. Completed a hands-on **3-month software development internship** and developed multiple full-stack web applications. Skilled in solving complex problems, optimizing performance, and delivering user-friendly solutions. Looking to leverage my technical expertise and internship experience in a **full-time software development role**.

WORK EXPERIENCE

SpriteEra IT Solutions Pvt Ltd

Remote

Software Development Intern

feb'24 – May'24

- **React.js, Tailwind CSS:** Built responsive user interfaces for optimal performance across devices, improving user experience.
- **Node.js, Express.js:** Developed **RESTful APIs** to enable efficient communication between the client-side and server-side.
- **MongoDB:** Designed and managed **NoSQL databases**, optimizing queries to enhance application performance.
- **Git, GitHub:** Used **version control** to track project changes, ensuring smooth collaboration and code integrity.
- **Postman, Thunder Client:** Tested API endpoints for functionality and performance, ensuring seamless integration between front-end and back-end.

COMPETITIVE PROGRAMMING

- **Codechef** (profile : divyanshu3101).
- **HackerRank** profile : @yadavdivyanshu41

SKILLS

- **Full Stack Development:** MERN stack (MongoDB, Express.js, React.js, Node.js)
- **Front-End :** React.js, JavaScript, HTML, CSS, Responsive Design, Tailwind CSS, ShadcnUI
- **Back-End:** Node.js, Express.js, RESTful API development
- **Database:** MongoDB, NoSQL, Database Design, Query Optimization
- **Version Control:** Git, GitHub, Source Code Management
- **Problem-Solving:** Debugging, Performance Optimization, Code Refactoring
- **Data Structures**
- **Algorithms**
- **Programming Languages :** C++, Python
- **Development Tools || IDEs :** VS Code, Google Colab, Kaggle, Jupyter, Anaconda, Replit

Training & Certifications

- **DeepLearning Training | 6 weeks | Remote** Internshala
- **Python Programming | Remote** Cognitive Class

Achievements

- Top coder among 100 from 4 disciplines at REC Kannauj's Hack Heist.
- Top score of 1221 at codechef

PROJECTS

E-Commerce Web App

Individual Project, MERN stack

[\[Github\]](#)

- Developed a fully functional, scalable online platform where users can browse **products**, manage their **carts**, place **orders**, and securely process **payments**.
- **Admins** can add, update, and delete products from the catalog using a dedicated dashboard.
- **Technologies** used : **Front-end:** React.js, Redux, Tailwind CSS **Back-end:** Node.js, Express.js **Database:** MongoDB **Authentication:** JWT, bcryptjs **Payment Processing:** Paypal API **Version Control:** Git, GitHub **IDE:** Visual Studio Code (VS Code)

Personal Portfolio

Individual, Frontend(Reactjs & Tailwind CSS)

[\[Github\]](#)

- Developed a personal portfolio website to showcase my skills, projects, and professional experience.
- Integrated EmailJS to facilitate easy communication through a contact form.
- **Technologies** used : **Frontend:** React.js, Tailwind CSS **Backend (for contact form):** EmailJS **Version Control:** Git, GitHub

Hospital Management System

Individual, MERN stack

[\[Github\]](#)

- Developed a full-fledged Hospital Management System with role-based access and functionalities for both **admins** and **patients**.
- **Admin Dashboard:** Admins can manage doctor and admin additions and validate patient appointments.
- **Patient Interface:** Patients can register and book appointments with available doctors.
- **Tools & Technologies** used : **Frontend:** React, CSS **Backend:** Node.js, Express.js **Database:** MongoDB **Authentication:** JWT (JSON Web Tokens) **API:** Axios for HTTP requests **Version Control:** Git, GitHub

Sound Classification System Using Deep Learning

Course Project, Deep Learning

[\[Github\]](#)

- Developed a Deep Learning-based Sound Classification System to categorize environmental sounds for a course project.
- Processed audio data with **MFCCs** and trained a **CNN** model for accurate environmental sound classification, visualizing progress and performance metrics.
- **Tools & Technologies** used : **Programming Language:** Python **Data Processing:** NumPy, Pandas **Audio Analysis:** Librosa (for feature extraction) **Visualization:** Matplotlib, Seaborn **Version Control:** Git, GitHub

Digit Classification Using Deep Learning

Course Project, Deep Learning

[\[Github\]](#)

- Developed a digital classification system to automate the categorization of images/texts based on their features.
- Implemented Convolutional Neural Networks (**CNNs**) for image classification tasks.
- Achieved an accuracy of over 98% on the validation set.
- **Technologies** used : **Deep Learning Frameworks:** TensorFlow, Keras **Programming Languages:** Python **Data Visualization:** Matplotlib, Seaborn **Development Tools:** Jupyter Notebook, Google Colab **Libraries:** NumPy, Pandas, OpenCV **Version Control:** Git, GitHub

Languages

- **Hindi** (Native)
- **English** (Fluent)
