Education

Bachelor of Technology in Information Technology (IT)

Madhav Institute of Technology and Science (MITS-DU), Gwalior (M.P.), India

2022-2026

CGPA- 8

Technical Skills

Languages: C, C++, JavaScript, Python

IT Constructs: DS and Algorithms, OOPS, Operating System, DBMS, Computer Networks

Web Development and Database: HTML5, CSS3, NodeJS, ReactJS, ExpressJS, MongoDB, Jquery, Firebase, Redux, RestAPI's, API testing.

Data Science: Machine Learning, Deep Learning, Neural Networks, NLP, Generative AI, Langchain, LLM, ChatBot Development, Agentic AI.

Experience

Rishishwar Industries Pvt Ltd.

Software Development Intern -

May 2025 -July 2025

Worked on multiple full-stack and backend-focused projects involving database design, RESTful API development, AI model integration, and data analysis. Contributed to projects like *Rojgar Setu*, *Ventures*, *Book My Load*, and an *AI Interview System*, delivering optimized UIs, robust backend logic, authentication systems, real-time processing, and automated data pipelines.

Projects

DEVCREFT-STUDIO : AI-Powered Portfolio,

Engineered an interactive, multilingual AI-powered portfolio blending sleek design with intelligent features - including real-time 12- language chat, ATS-ready resume analysis, and YouTube/article summarization. Built with React, TypeScript, Tailwind, and Groq API, dynamic animations, PDF exports, and a mobile-first, visually engaging user experience.

AGRO-ADVISOR,

Built a machine learning-based web application using Streamlit to recommend suitable crops based on soil and climate parameters. Implemented and compared models like SVM, Logistic Regression, and Decision Tree. Included a dynamic dashboard for visualizing crop production trends and soil nutrient analysis.

TALK-TRACK,

Developed an interactive data analytics dashboard using Streamlit and Python to visualize and extract meaningful insights from WhatsApp chats. Key features include user activity heatmaps, message trends over time, media and link sharing statistics, emoji usage analysis, and word clouds. Employed pandas, matplotlib, and seaborn for data manipulation and visual storytelling, with customized NLP preprocessing for enhanced text analysis.

CODE-GURU,

An AI-powered code teaching assistant built using CodeLlama and Gradio, designed to provide context-aware responses for coding-related queries. Features include interactive UI, prompt history retention, and REST API integration for seamless communication.

MATHS-GPT,

An AI-powered math and research assistant using LangChain and Groq for solving complex math problems, conducting data searches, and performing logical reasoning tasks.

EASILY: Job Portal Website,

Dashboard for managing job postings, an application tracking system, personalized job search based on user preferences, real-time notifications through Gmail, and a streamlined application process for users.

Academic, Extracurricular Achievements and Certifications

- Finalist in VIHAAN (National Level Hackathon organized by Delhi Technological University).
- Finalist in CodeFiesta contest, MITS-DU.
- Top performer in Google Cloud Study Jam, MITS-DU.
- Core member, Google Developer Groups (GDG-MITS).
- Generative AI and Agentic AI certified from udemy and Huggingface.
- MERN Stack Web Development certified from Coding Ninjas.
