

Tejas Nandankar

Data Analyst Intern , Data Analyst , Data Scientist

Aspiring Data Scientist with a strong academic background in Statistics and a passion for leveraging data to drive business insights. Skilled in statistical software such as Excel , Python , with experience in working with large datasets and applying machine learning techniques. Demonstrated dedication to continuous learning through participation in Kaggle competitions and hackathons

Plot No. 17 , Shri Mauli Niwas , Near Grampanchayat School , Tarodi Khurd, Nagpur, Maharashtra, India, 440035

Education

Post Graduate Diploma in DATA SCIENCE Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur | September 2022 - Present

Developed data models and predictive analytics models to forecast future trends and outcomes

Developed algorithms to identify and analyze complex data sets to identify patterns, trends and insights

Utilized various data mining and machine learning techniques to derive actionable insights from large data sets

Developed dashboards, visualizations, and reports to communicate insights to stakeholders

Bachelor's degree in PCM Shri Mathuradas Mohota Science Collage, Nagpur | April 2019 - July 2022

12th (Science) in Physics , Chemistry , Maths , Biology Rajendra High School & Junior College in Nandanvan , Nagpur | April 2017 - February 2019

10th Keshav Nagar High School in Nandanvan, Nagpur | January 2016 - March 2017

Key Skills

- Programming Languages : R , Python
- Statistical Analysis : Linear Models , Multivariate analysis , Sampling Methods
- Machine Learning : Regression , Classification , Clustering
- Database Languages : SQL , NoSQL
- Web Scrapping
- Curiosity
- Attention to Detail
- Strong Communication and Presentation abilities
- Time Management

Affiliations

- Participated in several Kaggle competitions and hackathons, gaining practical experience in data science and collaborative problem-solving.
- Developed predictive models using machine learning algorithms and statistical techniques to analyze and model datasets.
- Employed data preprocessing and feature engineering strategies to optimize model performance.
- Utilized programming languages (such as Python or R), libraries, and frameworks to build and evaluate models.

Certifications

Basics Of Python (Infosys Springboard) | January 2023

infyspringboard.onwingspan.com/web/en/ap...

In this course , I have learn about Various datatypes in Python Variables and their use Operators in Python Programming Constructs and Collections.

SQL(Basic) (Hackerrank) | May 2023

www.hackerrank.com/certificates/8a91f587...

This certification covered all the basics of SQL . I have learn commands , methods and queries on this platform and continuously learning .

Languages

- English - Competent
- Hindi - Proficient
- Marathi - Expert
