EDUCATION

Shri Ramswaroop Memorial College of Engineering and Management

Bachelor of Technology – Information Technology

Lucknow, India

JUN 2020 - Present

St. Fidelis College

Intermediate

Lucknow, India

JUN 2017- MAY 2019

SKILLS SUMMARY

- **Languages:** JAVA, JAVASCRIPT
- **Frontend:** HTML, CSS, JAVASCRIPT
- **Frontend libraries:** REACTJS, Tailwind CSS
- **Backend:** NodeJs, ExpressJS
- **Database:** MongoDB, SQL

WORK EXPERIENCE

Internshala — ReactJs Training

JUNE 2023 -JULY 2023

online

The training included a foundational introduction to React.js and hands-on experience in building web applications with a custom backend.

CETPA INFOTECH PVT. LTD — Java Training

JUNE 2022 -JULY 2022

Lucknow, India

Completed a comprehensive 30-day training program focused on Java programming language, covering topics such as object-oriented programming and core Java concepts

PROJECTS

ConnectLink | MERN, firebase, WebSocket

[link](#)

- ConnectLink is a comprehensive full-stack project developed with ReactJS, MongoDB, Express, Firebase, and WebSocket technologies. It serves as a platform to facilitate online connections between individuals. Leveraging WebSocket technology, it enables real-time messaging among multiple users. Additionally, it integrates ZegoCloud API for seamless video call connectivity.
- On the frontend, ReactJS is employed to ensure a dynamic and responsive user interface, while the backend utilizes Node.js with Express for efficient routing. Authentication functionalities are implemented using Firebase, and user data is securely stored in Firebase buckets.
- Key Technologies: ReactJS, MongoDB, Express, Firebase, WebSocket, Node.js, ZegoCloud API

CookClicks | MERN

[link](#)

- CookClicks is a dynamic recipe-sharing website designed to enable users to share and explore various recipes. Built on the MERN (MongoDB, Express.js, React.js, Node.js) stack, it offers a seamless user experience.
- Utilizing React.js on the frontend, CookClicks ensures an intuitive interface for users to easily browse and contribute recipes. On the backend, Node.js with Express.js is employed for efficient routing, ensuring smooth data flow. MongoDB serves as the database, facilitating robust storage and retrieval of recipe information.
- Moreover, CookClicks implements JWT authentication to ensure secure user access and authentication protocols. Key Technologies: MERN Stack (MongoDB, Express.js, React.js, Node.js), JWT Authentication

ACHIEVEMENTS

Google Developer Student Club (GDSC) Lead

- Established and served as my institution's inaugural College Lead of the Google Developer Students Club (GDSC). Organized multiple technical events, including Google WOW and Google DevFest, drawing participation from over 200 attendees. Delivered presentations on mobile development and web development topics during events.

Winner, "Solving for India Hackathon" - College Level

- Participated in a hackathon organized by Google Cloud in collaboration with GeeksforGeeks, leading a team of four individuals. Developed a public crowdfunding application aimed at supporting creators and MSMEs (Micro, Small, and Medium Enterprises), addressing pertinent challenges faced by these sectors.

NCC B Certificate (National Cadet Corps)

- Developed leadership and teamwork skills through participation in various NCC activities.
