SUMMARY:

Flutter Developer with expertise in flutter framework and state management. Skilled in building cross-platform apps (Android and iOS).

PROJECT:

To-Do App | *Flutter, BLoC, SQLite* | Mar 2025 - Present

- Developed a feature-rich To-Do application with task **creation, editing, and deletion** functionalities.
- Implemented **BLoC architecture** to **manage state** efficiently, ensuring smooth data flow and scalability.
- Integrated **SQLite** for **local data storage**, enabling offline access and **persistent data management**.
- Designed a **tab-based navigation** system with distinct views for All, Pending, and Completed tasks.
- Enhanced UI/UX with a sleek dark theme, custom **checkboxes**, and **task completion visual effects**.

FilmSaga | *Flutter, Dart* | Feb 2025 - Mar 2025

- Developed a movie information app that provides summary, reviews, and streaming platform details.
- Utilized a **list of maps** to efficiently store and manage movie data for seamless content display.
- Implemented a sleek UI with categorized movies sections (Bollywood, Hollywood, South) and genre like Recommended, Action, Comedy, Drama, Horror and Sci-fi for improved user experience.
- Integrated **dynamic navigation** with detailed movie pages showcasing ratings, genres, summary and cast information.
- Designed a visually appealing **splash screen** to enhance the app's professional look and feel.

TIP Calculator | *Flutter, Dart* | Feb 2025 - Feb 2025

- Developed a dynamic Tip Calculator app to calculate tip efficiently and split bills among multiple users.
- Implemented an intuitive UI with custom tip options in percentage or amount format using Flutter's **BottomSheet**.
- Ensured accurate calculations and data handling with optimized logic for bill splitting and tip distribution.
- Integrated **state management** techniques for better UI updates and seamless interactions.
