Education

Veer Bahadur Singh Purvanchal University, India
B.Tech in Electronics and Communication Engineering (ECE)

2020 – 2024

Experience

Indus Towers Limited, Gurugram
Associate TOC (Microservices Architecture)

Jun 2024 – Present

- Developed and maintained microservices-based applications using **Spring Boot**, improving system efficiency by **25%**.
- Integrated **JWT-based authentication** to secure access for **1,500+ users**.
- Engineered RESTful APIs to enhance system communication and data flow between services.
- Deployed and monitored scalable services using **AWS (S3, EC2)**, ensuring **99.9% uptime**.
- Optimized MySQL queries, reducing response times by **20%**.
- Automated testing and version control using **Postman, Maven, and GitHub**.
- Conducted code reviews, followed Agile methodologies, and collaborated with cross-functional teams to deliver high-quality software solutions.

IIT BHU, Varanasi
Vocational Training in Backend Java Development

Jun 2023 – Sep 2023

- Delivered a project using **Core Java, Spring Boot, Hibernate, and REST APIs**, achieving a **15% increase** in API performance.
- Worked extensively on **JDBC** for seamless database connectivity and debugging. Certificate

Skills

Programming Languages: Java (Core, J2EE), SQL, HTML, CSS, JavaScript
Backend Technologies: Spring Boot, Spring MVC, Spring Security, Microservices, Spring Data JPA, Hibernate
Web Technologies: Servlets, JSP, REST APIs, JSON
Database Technologies: MySQL, JDBC, SQL Optimization
Cloud Platforms: AWS (S3, EC2)
Tools and Platforms: Git, GitHub, Maven, Postman
Testing and Debugging: Unit Testing, Integration Testing, Postman
Concepts: Object-Oriented Programming (OOP), Data Structures, Stream API, Exception Handling, Design Patterns
Practices: Software Development Life Cycle (SDLC), Agile, CI/CD

Projects

Blog Backend Application (Microservices Architecture)

- Refactored the monolithic blog application to a **microservices-based architecture** to improve scalability and maintainability.
- Developed individual services for user management, post management, and comment handling using **Spring Boot**.
- Integrated **Twilio API** for OTP verification to enhance security.
- Utilized **Spring Security** for custom user authentication and role-based authorization.
- Enabled inter-service communication using RESTful APIs, deployed on **AWS** cloud infrastructure.

Employee Management System (Microservices Architecture)

- Migrated the application from a monolithic architecture to a microservices-based system to improve performance.
- Developed services for employee data management, payroll processing, and attendance tracking using **Spring Boot**.
- Utilized **Spring Data JPA** and **Hibernate** for seamless database operations with MySQL.
- Ensured secure communication between services using **JWT-based authentication**.

Achievements

- Secured **2nd place** in Council of Science and Technology (2024) for **She Guard Security System**. Certificate
