Committed to upgrading skills and embracing new technologies for future growth. Proven ability to adapt and excel in dynamic environments. Seeking opportunities to leverage expertise and contribute to innovative projects.

Technical Skills

- **Frontend Technologies:** Html, CSS, Javascript, React Js, Next Js, Redux, Redux Toolkit, Bootstrap, Tailwind CSS, MUI
- **Backend Technologies:** Node Js
- **Database:** MongoDB

Professional Experience

Micrasquare - Frontend Developer January 2023 - Present

- Developed and maintained scalable web applications using the React.js (React.js, Redux, MUI).
- Developed and deployed responsive user interfaces for web applications using React.js, enhancing user engagement by 25% and improving overall site usability.
- Collaborated closely with cross-functional teams to deliver high-quality software solutions.

Education

Bachelor of Computer Application (BCA)

Bhagwan Mahavir University (BMU)

- CGPA: 7.54
- Focused on computer applications, programming, and IT, graduating with strong analytical and technical skills.

Projects

Facility Max Pro

- It allows for all aspects of facility management to be consolidated in one platform, making it easier to oversee operations.
- The software can facilitate better communication among staff, which can lead to increased productivity and quicker response times.
- Many users appreciate software that is intuitive and easy to navigate, which can reduce training time and improve user adoption.

Senoko

- Utilized the Senoko Energy customer portal to efficiently manage account details and billing inquiries, enhancing customer satisfaction through timely resolutions.
- Analyzed energy consumption data via the portal to identify usage trends, contributing to the development of strategies for energy conservat.

CESIT

- A smart inventory management system developed for managing solar equipment in CESIT. The system includes features like:
- Check-In Item – When solar equipment is returned to the inventory.
- Check-Out Item – When solar items are issued to users or departments.
- Reserved Item – Allows users to reserve solar equipment in advance.
- This project ensures smooth tracking and availability of solar-related items using a user-friendly digital system.

ANSELL AI

- Leveraged AI tools to automate and streamline Excel data manipulation tasks.
- Performed actions such as header removal, data cleaning, formatting, and bulk processing.
- Improved data accuracy and efficiency in handling large datasets.
