EXPERIENCE

AccessInsights.ai | Software Developer Intern

Remote | October 2024 - Present

- Build and maintain responsive, user-focused interfaces with React.js and TypeScript.
- Style components using CSS and Tailwind CSS for optimal user experience.
- Integrate APIs to enable seamless data interaction within the application.
- Debug and optimize frontend code to enhance performance.
- Built features for Real-Time Image Generation, allowing instant image creation with dynamic user inputs by leveraging API integration for real-time processing.
- Developed an interactive interface for Text-to-Music & Text-to-Speech Generation, enabling users to convert text into speech or music seamlessly, enhancing the creative user experience.
- Enabled responses from 20+ AI models in a unified platform to provide multi-modal outputs, including text, speech, and code, ensuring efficient and versatile data delivery.

Usha Martin Cables Ltd. | Web Developer Intern

Silvassa, India | January 2024 - April 2024

- Completed a three-month internship at Usha Martin Cables Ltd., where I successfully executed a web cloning project utilizing HTML, CSS, JavaScript and MongoDB. Engaged in additional side projects involving HTML, CSS and JavaScript.
- Actively participated in company activities such as Safety Week. Performed miscellaneous tasks as directed by superiors, including sorting and organizing materials.

YBI Foundation | AI and ML Intern

Remote | July 2023 - August 2023

- Analyzed datasets from YBI Foundation on Google Colab. Completed a project predicting admission chances using machine learning models.
- Applied data science methodologies to extract insights and guide decision-making. Collaborated with a team to develop innovative solutions using machine learning algorithms.

Infolabz IT Services Pvt. Ltd. | React Developer Intern

Remote | July 2023 - August 2023

- A Remote internship as a React Developer Intern at Infolabz.
- JS, ES6 and React JS foundations were addressed during my internship. In addition, I worked on the React library and developed an API-Based News Application Using React JS.

SKILLS

Programming Languages: C Programming, Java, HTML, CSS, JavaScript, PHP, SQL
Libraries/Frameworks: React.Js, Tailwind CSS, Bootstrap
Tools / Platforms: Git, Vs Code, IntelliJ, XAMPP
Databases: MySQL

PROJECTS / OPEN-SOURCE

Online Voting System

HTML, CSS, PHP, MySQL, XAMPP

- I built an Online Voting System using PHP, HTML, CSS, and MySQL (XAMPP).
- Users can register, log in, and vote once, while the admin manages candidates and views real-time results. The system prevents duplicate votes, ensuring secure voting.

VirtualR

React.js, Tailwind CSS, HTML

- Developed a responsive and visually appealing landing page for a virtual reality platform.
- Implemented modern UI/UX principles using Tailwind CSS for styling and React.js for dynamic content rendering.
- Ensured cross-browser compatibility and optimized performance for different devices.

Positivus Marketing Agency

React.js, Tailwind CSS, HTML

- This project is a landing page for Positivus Marketing Agency, built with React.js and styled using Tailwind CSS.
- The focus is on creating a responsive, visually appealing interface that highlights the agency's brand and expertise.
- Tailwind CSS helps streamline styling, ensuring a modern, cohesive look across all sections, enhancing user experience and engagement.
