## Computer Science Engineer

✉ nasreencse21@gmail.com    ☎ 6307329418    📍 Aminabad, Lucknow, U.P.

### CAREER OBJECTIVE

---

As a dedicated and ambitious graduate, I am seeking an opportunity to begin my professional journey with an organization that values hard work. I aim to contribute meaningfully by applying my academic background, strong interpersonal skills, and a positive attitude towards teamwork and problem-solving.

### PROJECTS UNDERTAKEN

---

#### Games

Games projects can be a valuable addition to a resume because they demonstrate a variety of skills that are useful in the field of game development and other related fields like programming skills, game design skills, graphic design skills and project management skills.

#### API based Project

API or Application Programming Interface, is an intermediate between software that allows two apps to interact with one another. API's provide an easy way to retrieve and distribute data within and across companies. There are a lot of API available on the internet, including Twitter API, Amazon API, and various other APIs. This skill is useful in a variety of fields, such as software development, data analysis and marketing.

#### Monument and Architecture Travel Guide

The Monument and Architecture Travel Guide is a web-based application developed to enhance the tourism experience by providing a centralized platform dedicated to India's rich architectural and historical heritage. Unlike conventional travel apps that focus primarily on logistics and accommodations, this system emphasizes cultural education, real-time management and monument exploration.
