PROJECTS | [Link](#)

Credit Card Financial Dashboard

- Developed a dynamic Power BI dashboard connected to a SQL database to provide real-time insights into credit card weekly operations.
- Streamlined data processing & analysis to monitor key performance metrics and trends.
- Shared actionable insights with stakeholders based on dashboard findings to support decision-making processes.

Global Sales Dashboard

- Analyzed sales data in Power BI, tracking region, category, market, segment, and profit trends.
- Cleaned and processed data using Power Query, fixing errors and organizing by date and location.
- Created interactive dashboards with key metrics, forecasts, and insights to help in decision-making.
- Used DAX formulas for advanced calculations like average delivery time and yearly sales comparisons.

OLA Ride Data Analysis Dashboard

- Analyzed Ola ride data using SQL to find trends in bookings, cancellations, ratings, and payments.
- Created interactive Power BI dashboards to visualize key insights like ride volumes and customer behavior.
- Identified patterns according to revenue, cancellation, and ratings to support data-driven decisions.
