Projects

CPI Inflation | Excel

April 2024

- The aim of this project was to measure the average change in prices paid by consumers over a period of time for a basket of goods and services.
- Calculated CPI by comparing the general price level in the markets during a particular time period with a base year.
- Utilized Excel formulas and functions (such as IF, VLOOKUP, FILTER, and TRIM) to clean and organize datasets, ensuring data integrity.
- Removed duplicate entries using Excel's built-in tools to streamline datasets and enhance accuracy.
- Analyzed data trends and patterns using pivot tables and charts, providing actionable insights for decision-making
- Created detailed reports and dashboards in Excel to present cleaned and processed data in a visually appealing and easy-to-understand format.
- [Link](#)

Airline Dataset | Power BI, Excel

June 2024

- Analyzed Airline Dataset using Power BI and Excel to uncover insights and trends in airline operations and performance. The goal was to improve overall passenger experience.
- Cleaned and preprocessed raw airline data in Excel, removing duplicates, handling missing values, and standardizing formats to ensure data integrity.
- Generated detailed reports using Power BI's visualization capabilities, highlighting critical findings and trends in the airline dataset.
- Developed critical measures using DAX in Power BI to analyze airline performance, including Total Flights, Total Passengers, and Average Delay.

E-Commerce Company | Power BI, Mysql

August 2024

- The aim of the project was to analyze customer behavior and sales trends through complex SQL queries, providing actionable insights to improve marketing strategies.
- Executed complex SQL queries to analyze customer behavior, sales trends, and product performance, providing actionable insights to the marketing and sales teams.
- Integrated MySQL with Power BI to create interactive dashboards, enhancing data visualization and reporting capabilities.

Education

ANDHRA UNIVERSITY(Percentage: 62.40)
