SUMMARY

Proactive Computer Science Engineering graduate skilled in software development, data structures, algorithms, and machine learning. Proficient in Python, Javascript, and C++, with experience in project management and teamwork. Quick learner with a focus on problem solving and continuous improvement.

SKILLS

Languages: Python, Javascript, C++, C

Technologies: Reactjs, Nextjs, MongoDB, SQL, Nodejs, Expressjs, CSS3, Tailwind CSS, Bootstrap, Data Structures, Algorithms, Latex

PROJECTS

MERN stack	Elite Edge Fitness Website Provides a flexible, scalable database solution that can handle the varied and growing data needs of the fitness center, from user profiles to workout logs. Technologies: Reactjs, CSS3, HTML5, Expressjs, nodemailer, etc.
Deep Learning	Digit Classification using Deep Learning This project aims to create an advanced handwriting recognition system that accurately identifies handwritten digits across various styles and demographics. Technologies: Tensorflow, Keras, Pandas
Machine Learning	Movie Collection Prediction Using Deep Learning This project employs deep learning to build a model that predicts movie box office success using factors like marketing expenses, production costs, actor ratings, and genre. Technologies: Python, Pandas, Keras

EDUCATION

9/2020-8/2024	Graduation (B. Tech) Specialization: Computer Science and Engineering Aggregate CGPA: 7.6	Rajkiya Engineering College Kannauj
4/2018 - 4/2019	Senior Secondary Stream: Science (Physics, Chemistry, Maths) Aggregate Percentage: 80.8	Divine Public School, Gauhanna Ambedkarnagar
4/2016 - 4/2017	Secondary Stream: Science Aggregate CGPA: 10	RAV Public School, Itifateganj Ambedkarnagar

TRAININGS

Deep Learning

Internshala

- Successfully completed an intensive Deep Learning training program, equipping me with advanced skills in neural networks, model architectures, and deep learning frameworks.
- The duration of this training was 8 weeks.
- Completed a capstone project involving the detection of face mask.

Python

Cognitive Class

- Developed strong skills in data manipulation and analysis using Python libraries such as NumPy, Pandas, and Matplotlib.
- Mastered the fundamentals of Python programming, including data types, variables, operators, control flow, functions, and classes.

ACHIEVEMENTS

- Programming virtuoso with 5-star Hackerrank rating in C++, Python, and C.
- Top coder among 100 from 4 disciplines at REC Kannauj's Hack Heist.

LANGUAGES

Hindi (Native), English (Fluent)
