SUMMARY:

MERN Stack developer with a proven record of designing, implementing, developing web applications from scratch. Acquired strong foundation in JavaScript, MERN, I bring hands-on experience on both front-end and back-end. Skilled in creating dynamic responsive web applications. Prioritizing customer satisfaction above all. Always improving quality of work, maintaining it and rise above all competitions.

TECHNICAL SKILLS:

- Frontend: React.js, React Native, HTML, CSS, JavaScript
- Backend – Node.js, Express.js
- Database – MongoDB

TOOLS:

- Redux State Management
- Thunder Client
- REST Api Integration
- Auth (Session, Jwt) & Encryption (bcrypt)
- Version Control (Git, GitHub)
- Libraries (Bootstrap, Mongoose, Axios, Cors etc)

EXPERIENCE:

MERN Stack Training | Cosmo info Solutions | Jan 2023 - May 2023

- Learned and Practiced fundamentals of Web Development, created static responsive websites using HTML5, CSS3, and JavaScript.
- Expanded my expertise by acquiring in-depth knowledge of essential web development libraries, including Bootstrap for responsiveness and jQuery for streamlined client-side scripting. Successfully integrated these libraries in various projects.
- Acquired proficiency in the MERN (MongoDB, Express.js, Node.js, React.js) stack through dedicated learning and practical application, successfully designing and developing web applications from inception to completion.
- Independently conceptualized, designed, and implemented fully functional code for the final project.
- Promoted positive work culture among other trainees, encouraging team-work and problem-solving skills.

Projects:

[Visit](#) - **FitMe** – Frontend and Backend development

Tech Stack: Node.js, Express.js, MongoDB, Bootstrap, React.js.

- Frontend developed using React.js for a seamless interface, CSS, Bootstrap for styling.
- Backend Implementation using Node.js and Express.js to handle API integrations and database operations.
- API testing done via Thunder Client/Postman.
- Database Management utilized MongoDB as the database to store and manage user data and product information.
- User Authentication: Implemented user authentication using Sessions & password bcrypt.
- Product catalogue and Favourites functionality: created with features like search, filter and sort.

Education:

National Post Graduate College | Bachelor's Degree in Computer Applications | Oct 2020 – Dec 2023.
