sayedhassank4@gmail.com

Objective

Seeking a challenging and dynamic position as a skilled BCA graduate, where my strong foundation in computer science, proficiency in programming language, and problem-solving abilities can contribute to the success of the organization. Eager to apply my technical expertise and innovative mindset to tackle complex projects, while continuously learning and adapting to emerging technologies in a collaborative and growth-oriented environment.

Internship

CodSoft | Java Developer

August 2023 - September 2023

- REMOTE

Education

Dr. Ram Manohar Lohia Avadh University Ayodhya

2023

Bachelor of Computer Application | Information Technology

Skills & abilities

- Java, J2EE, C/C++, HTML, CSS, Ms. Office, MySql, Spring Boot, JavaScript, Postman

Projects

Travel Management System :-

Developed a comprehensive Travel Management System using Java and MySQL, designed to streamline the process of booking and managing travel services. The system is divided into two distinct modules: the Admin Module and the Customer Module.

- **Admin Module:** This module enables administrators to efficiently manage customer bookings, monitor service status, and ensure seamless service delivery. It provides tools for handling reservations, updating availability, and overseeing the entire travel management process, thereby enhancing operational efficiency.
- **Customer Module:** Focused on user experience, this module offers customers an intuitive interface for booking travel services. It allows users to easily search for, book, and manage their travel reservations, ensuring a smooth and hassle-free experience. The module includes features such as viewing booking history, modifying existing reservations, and receiving updates on their travel plans.

Portfolio Management System :-

Technology Stack: Java 21, Spring Boot, Spring Security, MySQL, REST APIs

Description: Developed a microservices-based Portfolio Management System enabling users to view and manage their investment portfolios. Key components include:

- **Net Worth Calculation Service:** Computes portfolio value by interacting with external services for real-time stock prices and mutual fund NAVs.
- **Share Price & Mutual Fund NAV Services:** Integrated external APIs to fetch real-time stock prices and mutual fund NAVs for accurate portfolio valuation.
- **Customer Portal:** An MVC application allowing users to securely log in and view their portfolio details.
- **Security:** Implemented JWT-based authentication with Spring Security to ensure authorized access.

Key Contributions:

- Designed and built the Net Worth Calculation microservice.
- Integrated real-time data APIs for accurate portfolio valuation.
- Ensured secure data access through robust security protocols.

Smart Dustbin :-

- Implemented a Smart Dustbin using an ultrasonic sensor to detect nearby objects and a servo motor to automate lid opening.
- Designed and programmed the system to respond when a person approaches, ensuring a hands-free waste disposal experience.
- Integrated sensor and actuator technology for real-time operation, enhancing hygiene and user convenience.
- Demonstrated expertise in IoT by combining hardware components and microcontroller programming.

Ultrasonic Radar System:-

- Designed and implemented an Ultrasonic Radar System for real-time object detection and monitoring.
- Integrated an ultrasonic sensor to detect objects within a defined range.
- Utilized a servo motor to rotate the sensor 360 degrees, enabling continuous area scanning.
- Developed real-time feedback on the distance and position of detected objects.
- Demonstrated skills in sensor integration, motor control, and real-time data processing.

Certification

MTA: Introduction to Programming Using Python	June 2021
- Microsoft	
Accenture Nordics Developer Job Simulation	
- Forage	December 2023
J.P. Morgan - Software Engineering Job Simulation	
- Forage	December 2023
