PROFESSIONAL EXPERIENCE

Data Analyst CEDCOSS Technologies Pvt. Ltd.	05/2024 – 08/2025 Lucknow, India
- Configured and optimised Freshworks CRM custom fields, migrations, validation rules, and automated workflows, ensuring data integrity and reducing errors by 25%. - Enabled closed-loop data analysis by integrating sales and marketing activity data, improving visibility into client acquisition and retention performance. - Integrated sales & marketing data for closed-loop analysis, improving visibility into customer acquisition and retention performance. - Designed chatbot responses and KPI dashboards (conversion rates, churn risk, acquisition journey metrics) to drive customer journey analytics, boosting quarterly revenue by 15%. - Assisted various department teams, including sales and leadership, with their daily data queries and reporting needs, supporting decision-making.	

Data Analytics Internship Digipodium 	08/2022 – 11/2022 Lucknow, India
- Cleaned, transformed, and preprocessed datasets using Python & SQL, improving model accuracy. - Built dashboards, applying regression and hypothesis testing to support data-driven decision making. - Documented workflows and reusable scripts to enhance problem-solving.	

SKILLS

Technical & Programming: Python, R, PySpark, NumPy, Pandas
Databases & Tools: PostgreSQL, MySQL, Excel, Freshworks CRM, ETL
Data Analytics: Exploratory Data Analysis (EDA), Hypothesis Testing, A/B Testing, KPI Tracking, Data Management, Process Automation, Data Integration, Data Modelling, Database Systems
Visualization & BI: Tableau, Power BI, Matplotlib, Seaborn, Metabase, Looker Studio

PROJECTS & TECHNICAL ACHIEVEMENTS

Project Summary 	2023 – 2024
- Completed 10+ analytics simulation projects with Forage in collaboration with BCG, KPMG, PwC, and Accenture, using Python, SQL, Tableau, and Power BI across retail, finance, consulting, and hospitality domains. - Developed predictive models (regression, Random Forest, clustering) with 93% accuracy in Walmart sales forecasting and improved data quality by preprocessing. - Applied A/B testing, hypothesis testing, and statistical analysis to support business problem-solving. - Built interactive dashboards and KPIs to extract insights and support decision-making.	

CERTIFICATIONS

- Supervised Machine Learning with Tree Based Models  - Data Science A-Z™: Real-Life Data Science Exercises Included  - Python for Data Science Course  - Data Visualization with Power BI 	- Statistics for Machine Learning  - R for Data Science  - Data Mining 	- The Data Science Course 2022: Complete Data Science Boot camp  - Data Analysis with Python  - Analytics with SQL and Python
