| <b>SQL</b>                         | SQL Queries, Functions, Normalization, SQL statements, Constraints     |

## TRAINING

---

### Software Development Engineer in Test (Manual and Automation)

- Manual Testing: SDLC, STLC, test case design techniques, defect life cycle, test plan creation
- Automation Testing: Selenium WebDriver with Java, TestNG for test management and assertions, Data-driven testing frameworks
- Bug Tracking and Management: Hands-on experience with JIRA.

## PROJECTS

---

**Shoppers Stack(E-commerce).** Worked on testing an e-commerce web application that included modules like user authentication, product browsing, cart management, and order placement. Focused on ensuring application functionality and stability through manual and automated testing.

**FACIFY.** It is a facial recognition tool designed for efficient attendance tracking. This project developed using Python, SQL and various libraries, aim to streamline attendance process by reducing paperwork and save time through an easy to use camera based system.

**Hospital Management.** Tested a hospital management web application designed to manage patient records, appointments, doctor schedules, billing, and admin operations. Ensured the system was functionally stable and bug-free through both manual and automation testing.

## CERTIFICATIONS

---

- Certification in Software Testing by Qspiders.
- Campus Ambassador for Manifest-Varchasva 2021-22, IIM Lucknow.
