SKILLS

PROGRAMMING

Languages:

Java • HTML • CSS

Frameworks:

SpringBoot • Hibernate

Databases:

MySQL

Familiar

Redis • ElasticSearch • Kafka

COURSEWORK

Data Structures and Algorithms

Database Management

Object Oriented Programming

Operating System

INTERESTS/ HOBBIES

• Learning new Technology and

Framework

• Travelling

PROJECTS

E-COMMERCE BACKEND SCALER ACADEMY

<https://github.com/Adilkhursheed001/UserServiceApp>

- Developed a **scalable** and **high-performance** eCommerce backend system using **Java** and **Spring Boot**, designed with a **microservices** architecture to handle various business functions.
- Optimized **API response** time from **1600 ms** to **250 ms** by caching API responses using **Redis**.
- **Integrated Apache Kafka** to broadcast user-related events, facilitating real-time communication across microservices, leading to improvement in system responsiveness and **triggering automated actions** like welcome emails or special offers based on user activities.
- **Tech Stack:** Java, Spring Boot, Hibernate, REST, Kafka, Redis, ElasticSearch, AWS, Stripe API.

MULTI-THREADED SERVER

<https://github.com/Adilkhursheed001/SingleThreaded>

- **Concurrent Client Handling:** Supports multiple client connections simultaneously using multi-threading.
- **Thread Management:** Each client connection is managed by a dedicated thread to maintain responsiveness.
- **Scalability:** Designed to handle a large number of concurrent clients without significant performance degradation
- **Tech Stack:** Java, socket (for network communication), threading (for multi-threading).

SNAKE GAME

<https://github.com/Adilkhursheed001/Snake-Game>

- **Simple Controls:** Use the arrow keys to navigate the snake in four directions: up, down, left, and right.
- **Responsive Gameplay:** Smooth and responsive controls ensure an enjoyable gaming experience.
- **Score Tracking:** Keep track of your high score and try to beat it with each new game.
- **Game Over Detection:** The game ends when the snake collides with the wall or itself.
- **Increasing Difficulty:** As the snake grows longer, the game becomes more challenging.
- **Tech Stack:** Java, JSwing (for game development)

LOW LEVEL DESIGN OF BOOKMYSHOW

<https://github.com/Adilkhursheed001/bookmyshow>

- Developed a sophisticated ticket booking engine that efficiently handles seat selection, reservation.
- **Tech Stack:** Java, MySQL, Spring.
