Education

Birla Institute of Applied Sciences

Bhimtal, Uttarakhand, India

Bachelor of Technology (2019-2023)

- Electronics and Communication Engineering

Raj Kumar Academy

Lucknow, Uttar Pradesh, India

Senior Secondary Education (Class 12)

- ICSE Board
- 2019

Raj Kumar Academy

Lucknow, Uttar Pradesh, India

Secondary Education (Class 10)

- ICSE Board
- 2017

Licenses & Certifications

- Fundamental Algorithms: Design & Analysis:** Swayam NPTEL (April 2023)
- Crash Course of Python:** Coursera/Google (February 2023)
- Interact with the Operating System:** Coursera/Google (August 2022)
- Python Data Structures:** Coursera/University of Michigan (July 2020)
- Python Programming:** Coursera/University of Michigan (July 2020)

Achievements

- Dainik Jagran District GK Winner (04/2015 - 04/2015)
- U14 District level Cricket (LCA) - 2nd Runner-up (04/2013 - 05/2014)
- U13 district level Cricket (LCA) - Runner-up (03/2013 - 04/2013)
- Wild-Life Week - Nukkad Natak
Inter-School Level in Science City

Technical Skills

- C
- DBMS
- Python
- Java/Jenkins
- Data Sciences
- Python Automation
- Spring Boot/Spring Framework

Soft Skills

- Flexibility
- Team Lead
- Adaptability
- Sustainability
- Analytical Skills
- Problem-Solving
- Time Management
- Professional Communication

Work Experience

Indian Institute of Technology – Bombay

Product Management Internship

January 2023 – March 2023

- Successfully collaborated with Professor to align product strategy, vision, product management, and roadmap, resulting in tailored product solution.
- Effectively sourced, organized and supervised a team of over 20 skilled artisan student verifiers and proof-readers of Internships.
- Collaborated seamlessly with cross-functional teams, gathering requirements, assisting in product development and executing various other relevant tasks.

BSNL - Bharat Sanchar Nigam Limited

Networking and Cyber Security Industrial Internship

July 2022 – August 2022

- Implemented comprehensive cyber-security measures encompassing firewalls, intrusion detection/prevention system and antivirus software, fortifying client data and network against cyber-attacks.
- During the BSNL Internship, gained hands-on experience in networking services such as leased lines, broadband, MPLS, VPN and proficiently resolved error code 143.
- Contributed to 45-days signal leakage maintenance at BSNL, highlighting its pivotal role in the Telecommunication Industry.

iSoftra Digital Pvt. Ltd.

Software Engineer Internship

February 2022 – May 2022

- Made substantial contributions in software development, testing, implementation, frameworks, database management and cross-platform root cause analysis for diverse software solution.
- Contributed to software troubleshooting, debugging and upgrades at iSoftra Digital Pvt. Ltd., enhancing performance and functionality in digital solution.

Projects

Li-Fi Communication: Text and Image Transmission

Present

- Exhibited mastery of Li-Fi Technology project, enabling swift wireless transmission of text and image using Arduino hardware and pair of LED bulbs (yellow and white light), revolutionizing data communication through light.
- Achieved seamless data transmission over a 10-meter range at a blazing speed of 2 giga-bits per second, accompanied by a transmission range of 40-centimeter and impressive latency of only 0.073 seconds, leveraging Li-Fi Technology.

RBI Data Analysis: Analysis on ROI - Return on Investment

September 2022

- Conducted an exhaustive ROI analysis to evaluate the efficiency and effectiveness of RBI's diverse investments, scrutinizing financial performance across multiple portfolios and gauging their impact on overall returns.
- Employing cutting-edge machine learning techniques on RBI data, achieved a remarkable 14% surge in ROI, resulting in substantial value enhancement.

Fake News Detection: Daily News Analysis

June 2022

- Implemented advanced analysis techniques and efficient rectification strategies to expedite the resolution of forgery news by 50%, leveraging state-of-the-art technologies for enhanced accuracy and effectiveness.
- Developed and deployed an advanced fake news detection system leveraging the prowess of Natural Language Processing (NLP) and Python, employing state-of-the-art techniques and algorithms for precise identification and classification of deceptive content.
- Made significant contributions in combating disinformation, reinforcing trust in news sources, and promoting the dissemination of credible information.

Salary Prediction Web Development: Salary Prediction using

Linear Regression & Random Forest

April 2022

- Engineered a cutting-edge machine learning-driven web application that utilizes job postings and candidate qualifications analysis to accurately forecast salaries.
- Employing advanced algorithms and techniques, the application offers valuable insights into salary predictions, aiding both job seekers and employers in making informed decisions.
- Engineered a Streamlit-based web app with Matplotlib and Seaborn integration for visually compelling salary predictions, enabling informed decision-making for users.
