EDUCATION

Allenhouse Institute of Technology Kanpur, India
B.tech in Computer Science And Engineering

Aug 2019 - Jun 2023
CGPA: 7.32/10.0

JPIC, India
HSC (Science)

Aug 2017 - May 2019

WORK EXPERIENCE

RABLO - WEB DEVELOPER INTERN

JULY 2022 - Sept 2022
Remote, India

- Developed, improved, and operated **web-based software**.
- Designed and deployed **responsive web** applications.
- **Collaborated** with team for feature enhancements.
- Write **clean code**, **drive technical design**, and take responsibility for technical delivery.
- Implemented **state management** with React.js. Integrated **front-end with back-end logic**.
- **Technologies**: HTML, CSS , JS, React

LETSGROW MORE - WEB DEVELOPER INTERN

Oct 2022 - Nov 2022
Remote, India

- Developed and managed **web-based applications** remotely from India.
- Created **responsive websites** for optimal viewing across devices.
- Specialized in **JavaScript libraries and frameworks**, notably React, for **dynamic web applications**.
- Contributed to the ongoing improvement and optimization of web applications, addressing **user feedback and implementing performance enhancements**.
- **Technologies**: HTML, CSS , JS

ACHIEVEMENTS

- **SECURED AIR 6751** at **GATE 2023** exam.
- Solved over **150+** problems on **Leetcode**.
- **QUALIFIED IN INFOSYS CERTIFICATE ROUND**.
- Solved over **400+** problems on **GeeksForGeeks** and **4th rank in institute** with a overall **coding score of 1400+**.
- **EXPERT (Level 7)** on CodeStudio powered by **Coding Ninjas**.

TECHNICAL SKILLS

Programming languages: C++, C

Skills: HTML, CSS, JS, ReactJS, Typescript(Basics), ReduxJS, NodeJS, ExpressJS

Technologies: Android Studio, React, Chakra UI

Miscellaneous: MONGODB, React Hooks, Tailwind CSS, Firebase

PROJECTS

1) Food Ordering APP - HTML , CSS , JS, ReactJS

Oct 2023 - Nov 2023

- Developed a food ordering application using **HTML, CSS, JavaScript, and React.js**, allowing users to browse nearby restaurants, view menus, and place orders conveniently.
- **Integrated API** calls to retrieve real-time information such as restaurant menus, availability, and pricing.
- Integrated React.js **components to manage the application's state**, improving performance and scalability while providing a smoother user experience.

–  Github

2) Netflix GPT - HTML , CSS , JS, React, Firebase

Jan 2024 - Mar 2024

- Developed a Netflix-inspired application using **HTML, CSS, JavaScript, and React.js** to create a visually appealing and **user-friendly interface**.
- Integrated **Firebase authentication** to provide secure user authentication and authorization features, enabling users to **sign up, sign in**, and securely access personalized movie recommendations.
- Conducted thorough testing and validation of the **GPT-based movie suggestion feature** to ensure accuracy, relevance, and effectiveness in recommending movies that align with **user preferences and interests**.
- Utilized **component-based architecture** to create reusable components for the movies card, promoting **code reusability and modularity**.
