

Anuj Yadav

PHP Developer

I'm a passionate full stack web developer who loves building responsive, user-focused, and scalable web applications. My core expertise lies in modern web technologies like Laravel, React.js, Node.js, and MongoDB, with a strong grasp of both frontend and backend development.

WORK EXPERIENCE

Computer Teacher

Samarpit Academy

01/2025 - Present

Achievements/Tasks-

- Successfully taught computer science subjects (C, C++, Python, MS Office) to students from Class 9 to 12 and BCA level.
- Delivered lectures and practical sessions on programming and computer fundamentals.
- Designed and implemented lesson plans tailored to different learning levels (school and undergraduate).

Laravel Developer Intern

OnisTech Info Systems

01/2025 - Present

Kanpur

Achievements/Tasks

- Developed and maintained scalable web applications using **Laravel 10+**, integrating features such as authentication, role-based access, RESTful APIs, and payment gateways.
- Worked on **admin panels**, dashboards, and dynamic CRUD operations using **Blade templates**, **Eloquent ORM**, and **Bootstrap**.
- Implemented **modular architecture** and followed MVC design principles to structure applications cleanly and efficiently.
- Used **Spatie Laravel Permission** package to build custom user roles (Super Admin, Admin, Manager, Staff) and manage access control.

SKILLS

MySQL

C Programming

Laravel (PHP)

Web Development (MERN)

Python(Basic)

Software Development Life Cycle (SDLC)

PERSONAL PROJECTS

Face Detection and Recognition Model (07/2023)

- Face Detection and Recognition Model with the help of Open CV and Haarcascade Algorithm which detect face and update the attendance of person in real-time.

Netflix UI/UX (12/2023)

- Through creating a Netflix clone from scratch using HTML and CSS. It taught me how to structure web content semantically and design responsive, visually appealing layouts. I also gained practical experience in applying design principles and organizing project files efficiently.

Stay Sphere (01/2025 - Present)

- "Stay Sphere" is a hotel booking management platform built using the Laravel stack and follows an MVC architecture. It features admin and client dashboard for efficient management. The frontend utilizes a blade template for a modern and responsive user experience.
