

FARHEEN

CAREER OBJECTIVE

To be a responsible professional seeking a challenging position in area of Software Testing at dynamic organization, where I can utilize and enhance my skills for the growth of the organization which would be beneficial for my success.

PROJECT

1) Manual Testing for OpenCart

- OpenCart is a popular open-source e-commerce platform that enables businesses to create and manage online stores. It provides a user-friendly interface and a range of customizable features to help merchants set up and operate their online businesses effectively.

Responsibilities-

- Developed and executed detailed test cases to validate core website features, including product listing, cart functionality, checkout process, and payment gateways.
- Documented comprehensive test scenarios and results. Also identified and reported critical defects, facilitating prompt issue resolution and minimizing user-facing bugs.

2) Manual Testing for Orange HRM

- Orange HRM is a embraced open-source platform for human resource management system. It provides a user-friendly interface and a range of customizable features to help merchants set up and operate their online businesses effectively.

Responsibilities-

- Created and implemented intricate test cases to verify fundamental website functionalities, encompassing product listings, checkout procedures. Also produced comprehensive test scenarios & outcome documentation.
- Detected and logged a significant count of critical defects, expediting timely problem resolution and mitigating user-experience disruptions.
