

EDUCATION

- DIT University** 2023
Bachelor of Technology in Computer Science and Engineering CGPA/Percentage: 7.69
- Lucknow Public College** 2019
ISC, New Delhi Percentage: 76.4
- Lucknow Public College** 2017
ICSE, New Delhi Percentage: 86.17

EXPERIENCE

- Taksh Education** December 2023 - Present
Full Stack Developer Intern Delhi
- Spearheaded end-to-end backend development for Taksh Education's innovative web applications, incorporating advanced AWS services for interactive video streaming, text messaging, deployment, and file storage.
 - Designed and implemented robust RESTful APIs, adhering to industry best practices for seamless CRUD operations.
 - Integrated advanced security measures, including middleware implementation and JWT token authentication, to fortify the backend infrastructure and ensure data privacy.
 - Optimized database performance and ensured data integrity through efficient data modeling, and AWS Simple Notification Services for text messages.
 - Collaborated closely with cross-functional teams to integrate frontend and backend components, resulting in a streamlined user experience and improved application performance.
 - Deployed and managed applications on cloud platforms such as AWS, leveraging Terraform to automate the process and ensure scalability, availability, and reliability.
- LinuxWorld Informatics Pvt. Ltd.** June 2022 - September 2022
Trainee Jaipur
- Contributed to the creation of "Cloud Multiplex," a web app optimizing cloud infrastructure costs.
 - Developed backend and frontend components, collaborating with a team, and utilized Terraform for infrastructure automation.
- LinuxWorld Informatics Pvt. Ltd.** June 2021 - September 2021
Trainee Jaipur
- Constructed a Live Streaming Video Chat App and implemented a car detection system with license plate recognition.
 - Automated tasks using face recognition, such as sending emails, WhatsApp messages, and provisioning AWS resources.

PROJECTS

- Cloud Multiplex** June 2022 - September 2022
Cost-optimizing web app for cloud infrastructure
- Tech Stack: HTML, CSS, JavaScript, Node.js, React.js, Terraform, AWS (EC2 and S3)
 - Collaborated on a team project to develop a user-friendly interface for specifying cloud infrastructure requirements. Utilized backend and frontend skills to implement logic and design.
- Grocery Ordering System** March 2020 - July 2020
Android app for grocery ordering
- Tech Stack: Android Studio, Java 7, XML, AdobeXD
 - Led full-stack development of an Android app for shopkeepers, optimizing business operations. Designed and implemented user authentication functionalities, including signup, login, and logout processes. Engineered a comprehensive item management system for CRUD operations.

TECHNICAL SKILLS and INTERESTS

Languages: C++, Java (7,17), Python, JavaScript

Tools: Git, Github, AWS Interactive Video Services, AWS (Simple Notification Services, EC2, S3, CloudFront, CloudWatch, Elastic Beanstalk , CodePipeline), Terraform, Docker

Frameworks/Libraries: Node.js, Express.js, React.js

Soft Skills: Communication, Problem-Solving, Teamwork, Adaptability, Time-Management, Leadership, Continuous Learning

Coursework: OOP, Computer Networking, Operating System, DBMS
