PROJECTS

• Pharmacy Management Project

The pharmacy management system is a system that stores data and enable functionality that organizes and maintains the medication use process within pharmacies.

• Design and Validation of IOT Device for Driver Drowsiness and High Stress Detection

About 20% of road accidents occur due to the distraction of the driver and health issues. Among that 30% is due to driver fatigue. There are many methods to monitor driver and there by alert him/her in case of distraction. This system is conducted to study various methods to detect the driver fatigue and to select an appropriate method to detect the causes of driver distraction. In order to reduce road accidents, we use the different sensor and buzzer to avoid the causes such as drowsiness.
