SUMMARY

Enthusiastic Core Java Developer with strong knowledge of OOPS, design patterns, data structures, and Java. Skilled in developing scalable Java applications using multithreading, collections. Also experienced in building responsive UIs with React JS, focusing on component-based design, state management, and REST API integration. Committed to writing clean and efficient code.

EXPERIENCE

Flipkart Clone – E-commerce Web Application

Ainwik Infotech

📅 03/2024 - 07/2024 📍 Greater Noida, India

A technology company focusing on web applications and IT solutions

- Built a visually appealing and responsive user interface using HTML and CSS, ensuring the design smoothly across various devices desktop.
- Utilized CSS Grid and Flexbox for structuring product listings and navigation efficient and flexible layouts while maintaining a clean design.
- Created intuitive navigation, product filters, and a smooth user interface for a seamless browsing experience, replicating essential features of the Flipkart website.

React CRUD Application

Ainwik Infotech

📅 08/2024 - 12/2024 📍 Greater Noida, India

A technology company focusing on web applications & App Management

- Developed a fully functional **CRUD web application** using **React JS**, enabling dynamic data handling for user management.
- Integrated API operations (Create, Read, Update, Delete) with a mock backend (JSON Server).
- Designed responsive and reusable **UI components** using modern HTML, CSS, and JavaScript best practices.

Post Karo (Self)

SounderGrad

📅 01/2025 - 02/2025 📍 Location

POST Karo is a newspaper-style web project designed to display dynamic news content that updates regularly, simulating a real-world digital news platform.

- Developed a modern newspaper layout using HTML and CSS for a clean and structured design.
- Designed fully responsive web pages to ensure smooth viewing across desktop, tablet, and mobile devices.
- Implemented content replacement logic to automatically refresh headlines and article sections without reloading the page.
- Ensured separation of content and presentation, making it easy to update news data without changing the design.

EDUCATION

BCA (Bachelor of Computer Application)

J.S University

📅 07/2021 - 06/2023 📍 Shikohabad (Firozabad), U.P

12th

Gautam Buddh Inter College

📅 04/2014 - 04/2016 📍 Ambedkar Nagar, UP

PROJECT

Flipkart Clone — E-commerce Web Application

Developed a Flipkart Clone web application using HTML, CSS, and JavaScript, replicating the design and layout of an e-commerce platform. Implemented responsive UI for a smooth user experience across devices.

React Crud Application

Developed a React CRUD Application using React JS, allowing users to Create, Read, Update, and Delete data with dynamic state management and API integration. Focused on reusable components and smooth user interaction.

Calculator Interface Improvement

Improved the user interface of a calculator application developed in Java, enhancing functionality with a more intuitive design, better usability, and additional features like error handling and input validation.

SKILLS

Clean Code	Core Java	CSS
HTML	Java	Java Spring
