

SIDDHARTH SINGH

Kanpur, Uttar Pradesh | ☎: +91-9838176164 | ✉: siddhu33singh@gmail.com | GitHub | Linked In | Portfolio

Java and ReactJS Developer with 1.5+ years of experience in developing scalable applications and robust backend systems. Improved system efficiency by 20% and reduced latency by 15%. Skilled in performance optimization, debugging, and delivering user-focused solutions. Experienced in collaborating with teams to meet project goals effectively.

Skills

- **Programming Languages:** Java (Java8), JavaScript, HTML5, CSS3
- **Frontend Technologies:** ReactJS, Tailwind CSS
- **Backend Technologies:** Spring Boot, RESTful APIs
- **Database:** MySQL
- **Programming Concepts:** Problem-Solving, OOPS
- **Testing and Tools:** Git, Postman, IntelliJ IDEA

Work Experience

TCS, Mumbai

06/2023-07/2024

Associate Software Engineer

- **Enhanced system performance and user experience** by designing and developing a portal using **React.js** for the frontend, with seamless integration of backend APIs to reduce reporting time by 25% and improve team efficiency.
- **Architected and implemented robust backend solutions** using **Java**, **Spring Boot**, and **REST APIs**, ensuring secure, scalable data processing and enhancing data accessibility for business users.
- **Boosted application reliability and user satisfaction by 30%** through optimized backend logic, efficient API design, and responsive frontend components, as validated by post-launch feedback surveys.
- **Streamlined workflows and improved operational efficiency by 10%** by automating key processes through frontend forms and backend services, reducing manual tasks and enhancing data processing efficiency.
- **Collaborated with cross-functional teams** to enhance navigation UI using **React Router**, optimize database queries, and implement scalable solutions, accelerating data-driven decision-making by 20%.

SK Info Techies, Noida

04/2023-06/2023

Software Developer

- **Collaborated with designers, developers, and product managers** to deliver high-quality web applications, achieving a **15% reduction in development time** by streamlining communication and task management, resulting in faster project completion and enhanced team productivity.
- **Conducted thorough manual testing**, identifying and resolving **95% of critical bugs** pre-launch, leading to a **flawless user experience** and significantly reducing post-launch issue reports.

Education

Pranveer Singh Institute of Technology

06/2018 - 05/2022

B.Tech in Computer Science Engineering

Project Work

Travel World:

- An online platform designed to offer personalized travel experiences by integrating travel bookings, user reviews, and local recommendations.
- Live Link: <https://travelworldbysid.netlify.app>

Data collection(2023):

- Conducting web scraping using tools like BeautifulSoup and Selenium to collect data from diverse websites.
- Cleaning and preprocessing data to ensure accuracy and consistency. Storing and managing collected data in MS-Excel. Successfully automated data collection processes, reducing manual effort by 75%.

College ERP Portal With Library Management And RFID Attendance(2021):

- Automating attendance with RFID tags could save an estimated **2-5 minutes per class** for teachers, amounting to **hours per week**.
- Automated attendance eliminates human error in record-keeping, **improving accuracy by 90-100%**.
- The e-library facility could enable **24/7 access** to digital resources, potentially increasing student utilization of learning materials by **20-50%**.
