Education

Kanpur Institute Of Technology

Computer Science And Engineering

Jun 2019

Kanpur, Uttar Pradesh

Experience

Wrocus Technologies Private Limited | Client: HT Media.

Oct 2023 – June 2025

Software Engineer

Gurugram, Haryana, India

- Developed a centralized application to manage API security, roles, permissions, and authentication using PHP (Laravel) and Python (Flask).
- Implemented user management and role-based access control (RBAC) for secure, scalable system workflows.
- Designed system approval workflows, enhancing operational efficiency and compliance.
- Designed and implemented web applications using Laravel, Flask and MySQL with CRUD functionalities.
- Secured APIs with OAuth2, JWT.
- Developed and maintained AWS Lambda functions for automated email processing, improving operational efficiency.
- Collaborated with cross-functional teams to deliver scalable and user-friendly solutions.

Fusioni Technology Pvt Ltd.

Feb 2021 – Oct 2023

Software Engineer

Noida, Uttar Pradesh

- Conceptualized, designed, and developed a comprehensive OTT (Over-the-Top) application from scratch, facilitating centralized management of videos, settings, subscriptions, and user accounts. Leveraged a robust skill set including Laravel, Python Flask, Rest API, API Integration, JavaScript, jQuery, Ajax, Bootstrap, CSS, Core PHP, Payment Gateway Integration, and OOPs principles to architect and implement features such as video content management, user authentication, subscription handling, and content categorization.
- Integrated AWS services including S3 for scalable storage, CloudFront for content delivery, Route53 for DNS management, and EC2 for hosting, aligning with client requirements for robust and scalable infrastructure. Implemented subscription features tailored to client specifications, incorporating payment gateway integration to enable seamless subscription management and monetization within the OTT platform, ultimately delivering a user-friendly and feature-rich streaming experience.

Clock Soft Solutions.

Jun 2019 – Nov 2020

PHP Developer

Noida, Uttar Pradesh

- Leveraged Core PHP and OOPs principles to craft robust solutions, while seamlessly integrating MySQL for efficient database interactions, ensuring optimal data management and retrieval.
- Contributed to creating APIs and front-end interfaces for multiple projects.
- Utilized Ajax to seamlessly communicate with APIs, enabling dynamic data retrieval and processing of responses in accordance with project requirements, thereby enhancing application responsiveness and functionality.

Technical Skills

- **Programming Languages:** PHP, Python
- **Databases:** SQL, MySQL, MongoDB
- **Web Technologies:** RESTful APIs, JWT, JSON, HTML, CSS, JavaScript
- **Frameworks:** Laravel, CodeIgniter, Flask, Microservices Architecture
- **Cloud Services:** AWS S3, CloudFront, EC2, AWS Lambda
- **Web Servers:** NGINX, Apache
- **Operating Systems:** Windows, Linux (Ubuntu)
- **Developer Tools:** Git, GitHub, Jira, Postman, VS Code
- **Familiar Skills:** Node.js, React.js
