## Education

### Bachelor of Technology

Babu Banarasi Das University

06/2020 - 06/2024

- Major in Computer Science and Engineering - CGPA: 8.2/10.0

## Skills

- Java | JavaScript | GoLang | SQL | Node.js | React.js | Git | GitHub | HTML | CSS
- Microsoft Azure | Lighthouse | Firebase | Cloudflare | WordPress | VS Code
- Frontend | Backend | Full-Stack Development | SEO | Analytics | Language: English, Hindi

## Experience

### Software Development Intern

XenonStack

02/2024 - 04/2024

- Developed custom **Linux commands** using shell scripting to enhance system functionality and productivity.
- Created and tested scalable **GoLang APIs** using RESTful principles and Thunder Client.
- Managed databases using SQL, improving backend operations.
- Applied **DevOps** practices, including CI/CD, to enhance collaboration and development cycles.

### Microsoft Student Ambassador

Microsoft

10/2022 - 10/2023

- Contributed to GitHub **open source** projects, managing pull requests and code reviews.
- Developed and deployed web apps on Microsoft **Azure** using HTML, CSS, and JavaScript.
- Organized and hosted technology-focused events and workshops for students.
- Mentored peers on **Microsoft tools**, promoting skill development.

### Web Development Intern

CodSoft

07/2023 - 08/2023

- Developed dynamic features using React.js, Bootstrap, HTML, CSS, and JavaScript.
- Integrated payment gateways and **authentication** systems for secure transactions.
- Collaborated on web development projects, resolving technical issues efficiently.
- Deployed projects on GitHub and **Microsoft Azure**, ensuring scalability and seamless integration.

## Projects

- **ExcelBook:** Developed features with two-way binding properties for sheet cells with **CRUD operations** sync across multiple sheets. Implemented robust features such as **data import/export**, printing, and real-time tab title updates. [Link](#)  
**Technologies Used:** JavaScript, DOM, HTML, CSS, Bootstrap.
- **Crypto Tracker:** Created a web app for real-time cryptocurrency tracking, market analytics, and trend visualization. [Link](#)  
**Technologies Used:** React.js, JavaScript, API integration, Node.js
- **Recipe Book:** Built a recipe app featuring search, filtering, and personal recipe list functionalities. [Link](#)  
**Technologies Used:** React.js, API integration, Javascript, Node.js, Jest, Bootstrap
- **Quick Store:** Developed a dynamic **e-commerce** platform that enables **sellers** to list products and **buyers** to make purchases, featuring Firebase for real-time updates and a secure **payment gateway** for transactions. [Link](#)  
**Technologies Used:** Firebase, Stripe, AWS, Express.js, Node.js, HTML, JavaScript, Bootstrap

## Coursework

- **MERN Full-Stack Development Trainee at Acciojob:** Focused on MongoDB, Express.js, React.js, and Node.js technologies, developing advanced projects. (05/2023 - 05/2024)
- Data Structures and Algorithms | Structured Query Language | Object-Oriented Programming (OOP) | Database Management Systems

## Achievements

- **AWARD:** Ranked **1st at the District Level** and **3rd in the State Level** Jawaharlal Nehru Science, and Mathematics Exhibition.
- Solved **1300+** DSA and Frontend Development questions on the **AccioJob** Portal.
- Maintained a 270+ day streak in DSA and **Frontend** problem-solving.
- Made **400+** contributions on GitHub in the last 5 months.
