- IBM Internship in Frontend web development.

PROJECTS

Simon Game The Simon Game is a memory-based game where players repeat a sequence of flashing buttons and sounds. Built with HTML, CSS, and JavaScript, it generates a growing pattern that players must correctly replicate. If the player makes a mistake, the game will over and restart. [\(link\)](#)

Virtual Assistant Imagine having your own Virtual Assistant right in your browser! Built with HTML, CSS, and JavaScript, this smart assistant listens to your voice commands, understands them, and performs tasks like opening websites, fetching data, or controlling webpage elements. Using the Web Speech API, it makes interactions feel natural and hands-free! [\(link\)](#)

Travora Our end-to-end travels website connects travelers with hotels, flats, rooms, and properties through a seamless booking experience. Built with React.js, Node.js, and MongoDB, Middlewares, Validation etc it offers real-time availability, secure payments, and an intuitive interface for both travelers and property owners. With advanced search filters, verified listings, and a user-friendly dashboard, it ensures a hassle-free and reliable stay experience worldwide.

ACHIEVEMENTS

100+ question solved on Leetcode.

Completed Data Structure and Algorithm in Java(Full Course) from Apna college.

Completed Web Development Course from Apna College.

Completed 11 weeks workshop on Data Structure and Algorithm from Geeks for Geeks.

Completed React.js full course from LinkedIn Learning.

CISCO Certified in IT Essential and Networking and switching.

NCC Certified.
