SKILLS

- Core Java
- Advance Java
- Spring Framework
- JavaScript
- JSP
- Data Structures and Algorithm - easy level

SUMMARY

Aspiring Software Engineer with a passion for problem-solving and a knack for finding creative solutions. Proven experience in Core Java, Advanced Java, Spring Framework and JavaScript. Seeking a challenging role where I can use my skills to make a positive impact.

EDUCATION

Bachelors of Science in Information Technology: Information Technology
Amity Insitute of Information Technology
Jul 2018 - Jul 2021
CGPA: 9.18

- Received Merit Based Scholarship for consecutive 3 years

Masters of Computer Application: Computer Application
Amity Institute of Information Technology
Aug 2021 - Jun 2023
CGPA: 8.73

INTERNSHIP

Intern
Precursor Info Solution, Lucknow
Jan 2023 - Jun 2023

- Wrote clean, clear and well-tested code for 'Driving Mitra' project.
- Collaborated with other developers to identify and alleviate number of bugs and errors in software.
- Learned software engineering process improvements and best practices.
- Met with Product Manager on weekly basis to provide detailed project report and milestone updates.
- Used development tools such as Eclipse IDE and mySQL Workbench on regular basis.
- Supported software engineering projects in Agile work environment.
- Designed and developed project using SQL database.

PROJECTS

Driving Mitra
Jan 2023 - Jun 2023

- Main objective: to revolutionize finding and engaging with driving schools
- Developed a comprehensive portal for driving schools
- Streamlined training process for learners and driving schools
- Eliminated complexities of finding driving schools
- Unified platform for trainees and driving schools
- Prioritized user experience and technical prowess
- Curated list of driving schools with detailed information
- Trainees could make informed decisions
- Driving schools gained visibility and exposure
- Increased business growth opportunities
- Seamless payment system for trainees
- Streamlined enrollment process
- Reduced administrative overhead
- Collaborated on all stages of systems development lifecycle from requirement gathering to production releases.

Technology Used: Java, Spring Framework, Spring MVC, jQuery, javaScript, JSP and mySQL as database.

Student Management System
Aug 2023 - Nov 2023

- Learned the fundamentals of Core Java, including object-oriented programming, data structures, and algorithms.
- Developed a desktop application called Student Management System using Java Swing.
Worked closely with senior developers to learn about the software development process.
- Participated in daily stand-up meetings and sprint planning sessions.
- Tested and debugged code.
- Contributed to the documentation of the project.
- Developed the Student Profile Management Module and Teacher Profile Manangement.

Technology Used: Core Java Concepts used by Java Swing and Java AWT

For two years, I immersed myself in freelance writing for ed tech platforms, establishing my expertise in educational technology. I contributed to Testbook and Delfstack, crafting accessible content that guided learners through complex topics. My writing resonated with aspiring exam takers, offering both clarity and motivation. At Delfstack, I explored programming and digital literacy, using my words to simplify intricate concepts. These two years reflect growth, empowerment, and a lasting connection with learners. My time as a writer for Testbook and Delfstack remains a significant chapter in my technical journey.
