OBJECTIVE:

As a second-year Computer Science student with a strong foundation in web development technologies and large contribution in open source experience seeking a position in your organization.

TECHNICAL SKILLS:

- **Frontend** - Javascript, TailwindCSS, ReactJs, Typescript, Bootstrap, ShadCN.
- **Backend** - Node Js, Express Js, Typescript, NEXT JS.
- **DevOps** - Docker for containerization and Git for version control.
- **Search Engine Optimisation.**

PROJECTS:

[\[Link\]](#) **GITDOWN- An application for generating Markdown content for your GITHUB REPO.**

Description: This application allows you to easily generate Markdown content using predefined and custom fields. Whether you're writing documentation, README files, or any other Markdown-based content, GitDown simplifies the process.

[\[Link\]](#) **PDF Merger - Merge your 2 PDFs**

Tech Stack: Javascript, TailwindCSS, Node Js, Express Js

- For the frontend, used Javascript and Tailwind CSS for design.
- For the backend used Express Js server to merge PDFs
- Used a custom background image that I made in Adobe Illustrator.

[\[Link\]](#) **WeatherXT - Know the weather of your City**

Tech Stack: React JS, Axios, TailwindCSS, WeatherAPI

- For frontend, React JS is used for handling all the components and events.
- For the weather data, OpenWeatherAPI is used.
- For fetching the API data, AXIOS is used.

[\[Link\]](#) **BlackRed - Reduces image size**

Description: This is a web-based application that allows you to reduce the size of images (PNG, JPEG, GIF, etc.).

- Uses NEXT JS
- Uses typescript and tailwind CSS.

EDUCATION:

Dr. A. P. J. Abdul Kalam Technical University, Lucknow | Bachelor of Technology in Computer Science | 2022-2026.
