CBSE, English

Projects

65 Days

college management system

College management system is a web application. This system is developed to automate work and marks activity of the students. This system can be used by the Admin (Principal), Teachers (HOD) and also students. With this system, managing attendance and results will become easier and systematic to replace traditional system where

all still using paper. The main aim of developing this system is to help the college management to manage the records more quickly. We are designing the e college management system to automate the attendance, erp detail, results , weekly performance & generating Reports according to the working of system .Performing all these tasks manually becomes too complex and time consuming.

2 Days
