SUMMARY

Highly motivated Front-end Developer experienced in developing digital experiences gained through academic journey and professional certifications. I dedicated 3+ years to improving user interfaces by adding interactivity, optimizing web pages, and ensuring web accessibility for everyone. With proven abilities, I'm ready to apply my analytical skills to develop quality solutions.

EXPERIENCE

Oasis Infobyte

Sep 2023 - Oct 2023

Web Development Intern

- Achieved the target of designing and implementing 3 websites in 1 month using HTML, CSS, JavaScript

Tutors Point

Jan 2020 - Present

Teacher

- Taught 10+ students from classes 5th to 9th enhancing their knowledge, understanding, and confidence in Maths, Science, Computers, Social Science and languages with a focus on critical thinking and problem-solving.
- Implemented structured tutoring techniques that led to measurable improvements in students' academic performances.

PROJECTS

AI Recipe Generator (Chef Seek)

Beautifully created AI Recipe Generator web application that is responsive and has an engaging user interface that allows users to input ingredients they have at home and get a generated recipe from an AI API.

- Create a list of ingredients by adding your favorite ingredients on hand, and get a remove button instantly.
- Users can remove unnecessary ingredients from the bottom of the list before getting the recipe.
- Get a delicious recipe with a click from an AI API, including a well-formed representation of the recipe name, ingredients, and instructions.
- Transform your application from light to dark mode to enhance readability and visual clarity.
- Technologies – HTML, CSS, JavaScript, Tailwind CSS, React js, Hugging Face, Node js, and Material UI.

Lightbox Image Search

An image search website with a clean, responsive, and beautiful interface, where users with a single search can get over 8 images each with a description using a public API

- Users can get images through Pexels' restful JSON API
- Over 8 images in different sizes stacked together with a responsive grid layout
- Implemented Lightbox for a better viewing experience. After clicking on any image, the image overlays on top and holds its width according to the screen size. Users can also get a full description of an image
- Uses Web3forms' contact form API service for form submission

EDUCATION

Aligarh Muslim University

Jan 2020 - Dec 2022

Bachelor of Science in Computer Science

CERTIFICATIONS

Modern HTML & CSS From The Beginning 2.0 (2024 Revamp)

Dec 2024

Learned about various HTML tags and their usage along with responsive web design, flexbox, grid, web accessibility, advanced selectors

The Complete JavaScript Course 2025: From Zero to Expert!

March 2025
