

SUMMARY

A junior software engineering professional possessing an understanding of full-stack web development and leveraging the same to design & deploy scalable applications via JavaScript, CSS, HTML, PHP, and Python. Highly skilled in unit testing and conducting code reviews while playing a key role in troubleshooting software.

INTERNSHIPS

Intern	Jul '22 - Sep '22
Mind You InfoTech	Lucknow
- Proficient in utilizing PHP and Python programming languages for developing server-side applications and implementing efficient solutions - Demonstrated expertise in utilizing Laravel framework for backend development to create resilient web applications	

PROFESSIONAL EXPERIENCE

Fullstack Developer	Jul '24 - Present
CMP Techsseract LLP	Lucknow, India
Designed and developed a comprehensive Project Management System to streamline project tracking, task assignment, and team collaboration.	
Fullstack Developer	Apr '23 - Jun '24
Complete Cure	Lucknow, India
- Developed the Gemologist, Astrologer, Portfolio, and Trayambkeshwar projects, managing both frontend and backend. Achieved a 90% increase in user experience through - Crafted 5+ functional websites with high-quality, clean, and reusable code - I have integrated Google Analytics and payment gateway (PhonePe, Razorpay, Paypal, and PayU) in my projects and also stored location through IP - Experience using cPanel to manage web hosting	
Fullstack Developer	Oct '22 - Mar '23
Mind You InfoTech	Lucknow, India
- Designed and crafted the website front-end via HTML, CSS, and JavaScript, and designed the website architecture and its backend works via PHP Laravel - We have created a project for Educational purposes and for a Car service provider. We collaborated with our team for both frontend and backend work	

EDUCATION

Bachelor of Computer Applications	Jul '21 - Jun '24
Integral University	Lucknow, India
I have learned various technical skills like HTML, CSS, PHP, JavaScript, and Python and have put my hands into them by building small projects.	

PROJECTS

Trayambkeshwar	Feb '24 - Apr '24
Complete Cure	Lucknow
https://trayambkeshwar.com/ I created an online selling course focusing on gemology and energy-wise scanning of gems, integrating various technologies. Utilized HTML, CSS, Bootstrap, and JavaScript for frontend development, and AJAX with the Laravel Framework in PHP for backend functionalities. Integrated the PhonePe payment gateway and Google Analytics for comprehensive tracking of user interactions. Implemented IP tracking to determine the geographical locations of website visitors.	
Astrologer	MMM 'YY - MMM 'YY
Complete Cure	
https://astrocure.gritl.in/	

Created multi-login authentication for SuperAdmins, astrologers, and users, along with creating dynamic services for users. Integrated PayPal payment gateway for seamless transactions.
