

VIJAY DUBEY

Assistant Consultant (Oracle Database Development)

 Contact No: 8826104911  Email ID: vj11.vijay@gmail.com

Professional Summary

Focused PLSQL Developer, offering 10.9 years of full life-cycle implementation experience as an Oracle PL/SQL Developer in from Analysis, Design, Development, Testing, Implementation and Maintenance with timely delivery against aggressive deadlines in Oracle Relational Database Management System (RDBMS) and hands-on skills in information technology. Normalized/De-normalized tables, Self-motivated, excellent analytical and programming skills, ability to go to the core of the problem having good work ethics with excellent communication & interpersonal skills. Good team player and ability to master new technologies quickly. Technically proficient; thrive in environments that constantly embrace new technology.

Skills

Oracle 18c/12c/10g PL/SQL SQL *PLUS TOAD SQL*LOADER CBO Explain Plan Hints
Query Optimizer Execution Plans Table Functions Crontab Scheduling
Agile Methodology Daily Scrums SQL Developer PL/SQL Developer 7.1.5 TOAD 8.5/9.6
External Tables ,Sql Loader ,Utl_file Stored Procedures M-Views Analytical Functions Query Performance
Encrypting Data Temp Tables Control-m Scheduler Oracle built in Scheduler
Web programming Oracle apex,html,css,javascript,jquery,ajax Console programming C
Fundamental of Unix shell scripting

Education

Uttar Pradesh Technical University
Master of Computer Applications
UP, India

Experience

Tata consultancy Services

Client: TD BANK CANADA

Mar 2024 - 2025

- Written the code packages for creation of objects such as tablespace, grants, assigning roles to user, export import parameter files etc.
- Performed AES encryption technique on tablespace level to secure the data.
- Updated multiple documents on client documentation portal regarding this migration activity.
- Created documents for deployment steps for this migration process by which DBA team will execute each code package step by step.
- Worked with multiple international users from different countries and communicated with them and gathered the requirement and worked on that.
- Submitted written code packages under the bit bucket git repository.
- Created multiple tickets to start the deployment process using NPID portal of client .
- Generated random password using automated sql for each account to avoid the SQL injection attack on Specific user account.

Tata consultancy Services (Ultimatix project)

Dec 2021 - Feb 2024

- Multiple code fixes and enhancement written in plsql and sql using oracle database 12c.
- code enhancement of plpgsql using pgadmin (Postgres db) for the inhouse ultimatix project .
- created multiple views in PostgreSQL and coordinated independently with qlik view dashbaord team and validated the coming output there on charts and kpi .
- helped many junior resources during their requirement understanding and workflow understanding .

HCL technologies Noida

Feb 2019 - Dec 2021 | Noida

- Fixing job failure and creation of new jobs.
- Gained Knowledge about retail process, such supplier onboarding, component creation, product maintenance and creation process, lifecycle of product etc.
- Pulling data from source, manipulating them in stage environment, and after That sending such data for downstream consuming using interfaces.
- Developing, Debugging and Enhancing SQL queries for complex business requirements.
- Created dynamic html and css based reports (bootstrap responsive browser based data tables with search and export to excel ,csv ,pdf options) using plsql programming(Embedded html,jquery,css inside plsql)
- Used collection (varray,nested tables , associative array),bulk binding using bulk collect and for all with save exceptions(To avoid bad records for further analysis) .
- Using dynamic sql ,here generic shell script will pick entries from table and send the flat file to downstream for data consuming.
- Automated supplier deactivation, component reporting etc
- Involved in gathering, analyzing, and documenting business requirements, functional requirements .
- Uses of advanced features for performance tuning such as dbms_profiler,prgma_udf,awr report analysis , partitioning of tables,hints(parallel,append,append_values,driving_site (for remote objects) etc.. ,explain plan analysis , indexing , designing of data base objects in optimized manner , compressing objects to release extra spaces.
- Sql loader and external table uses for processing of flat files.
- Json and xml data processing
- Team mentoring, business meeting directly with stakeholders, users.
- Collecting team members task status and submitting it to RM during stand up calls and assisting team wherever its required.
- Scheduling of JIL and monitoring of running jobs in Autosys.
- Created dynamic file watchers which will collect data from file once it will be present on server.
- Excellent command over tracing coming error in existing code using multiple approaches such dbms_error package,built in exception handling, user defined exceptions handling, dbms_utility.format_error_backtrace .
- Utl package uses for flat file processing.
- Encryption and decryption of confidential data using different security algorithms (AES,DES,MD5,MD5 WITH HASH KEY) using dbms_crypto package.

Pure Software Noida

Dec 2018 - Feb 2019 | Noida

- Worked on Master data management where based on few configurations application will be designed using less code environment.

- Worked on sql and plsql based maintenance activities.
- Learned about insurance modules basics during 3 months.
- Getting requirement using Jira and deployed Work using client Mdm configuration tool

CenturyLink, Inc (USA)

2016 - 2018

- Develop Data warehouse ETL process.
- Interacting with the Business to understand the requirements.
- Working with SQL, PL/SQL, UNIX for analyzing and automating the business process.
- In depth data Analysis.
- Build Control –M jobs.
- hands on skills with data migration using json, Xml and other methods
- Data warehouse job development and monitoring it's execution. And exchanged Data from multiple sources like salesforce database using command line arguments.
- Uses Hints, Explain plan, collection techniques, and performance tuning to optimize sql queries.
- implemented and automated multiple database activities using dynamic sql,ref cursor, analytical functions.
- Written multiple shell scripts for generating database reports in html format and sending automatically to end client via email.
- created pivot dashboard using Excel and Oracle database with deaired refresh frequency .
- created triggers on db objects fo auditing and preventing user operations as well implemented several auditing techniques
- Created Cron jobs for scheduling database tasks. And worked on oracle schedulers as well.
- Created multiple stored procedures using collection, stored functions, inbuilt and user Defined exceptions, packages, hierarchical queries, indexing techniques, etc

National Informatics Centre

Oct 2015 - Aug 2016

- Created and Customized Oracle forms as per the requirement of NIC Officers.
- Created tables ,views ,procedures ,packages ,triggers and others database object as per the given requirement of NIC officers.
- Learned about functional knowledge of Indian customs application for importing and exporting goods through an automated channels by using distinct activities.
- Migrated old forms in 11g oracle forms.
- Partitioned the table using range and list partition.
- Performed unit testing of each form
- Create jar file and integrated with oracle forms using java programming.
- Used plenty of java features for encryption and decryption of sensitive data of custom department using des and aes algorithm.
- Participated as a team member in the development of Indian government Single window system development. Created multiple scripts for database design.
- Performed sql tuning activities .
- Created several forms using oracle form builder and developed html excel reports and integrated with application.
- Created scheduler based activities to automate the task.
- Skills in oracle wallet and other security algorithm .
- created excel reports using oracle forms as well as generated multiple varieties of reports using oracle report builder such as ,group above report, group left report ,matrix reports and tabular reporting.
- Hands on skills with collection as well as bulk collect to avoid context switching.
- Good skills in database designing and creating database structure using different database objects.
- Integrated javabeans in oracle forms using jar file .
- Integrated webutil toolkit to oracle forms to enhance the capabilities of oracle forms for dealing at client side.

Arden infotech Pvt ltd

May 2014 - Oct 2015

- Worked on SQL*Loader to load data from flat files obtained from various facilities every day.

- Created and modified several fmb's and mmx as well as reports according to the changing needs of the project and client requirements.
- Executed purchase module of Oracle apps and designed customized purchase order Amendment process. Hands on experience with finance, sales, purchase modules of erp
- Involved in the continuous enhancements and fixing of production problems.
- Created PL/SQL stored procedures, functions and
- Created scripts to create new tables, views, queries for new enhancement in the application using TOAD.
- Created indexes on the tables for faster retrieval of the data to enhance database performance.
- Involved in data loading using PL/SQL and SQL Loader, Utl function, External Table
- Used Bulk Collections for better performance and easy retrieval of data, by reducing context switching between SQL and PL/SQL engines.
- Created PL/SQL scripts to extract the data from the operational database into simple flat text files using UTL_FILE package.
- Creation of database objects like tables, views, materialized views, procedures and packages using oracle tools like Toad, PL/SQL Developer and SQL* plus.
- Extensively used the advanced features of PL/SQL like Records, Tables, Object types and Dynamic SQL.
- Utilized various utilities such as Explain Plan, TK-Prof, and DBMS STATS in tuning the SQL interfaces.
- Strategized the design, code, and system/unit test plan reviews to enhance project quality.
- Having skills in table partitioning using different partition methods such as list, range, hash and composite partitioning methods .

Projects

- Project 7 : Tata consultancy Services
- Project 6 : Tata consultancy Services
- Project 5: HCL technologies Noida
- Project 4: Pure Software Noida
- Project 3: CenturyLink, Inc (USA)
- Project 2: National Informatics Centre
- Project 1: Arden infotech Pvt Ltd
