- Participated in a **hackathon (SMVDU CodeAthon'22)** in a team of 4 people and **secured first position**
- **AWS academy graduate** on cloud foundations
- **Open Source Contributor** at GirlScript Summer of Code

EXPERIENCE

Software Engineer Intern August 2023 – September 2023 Hisales Consulting Private Limited
Remote, India

- Conducted comprehensive research and analysis to identify opportunities for process automation and improvement. Provided crucial support in diagnosing and resolving technical issues related to automation, ensuring minimal disruption to daily operations.
- Successfully enhanced the website's user interface and user experience, resulting in a seamless and visually appealing platform.

Web Developer Intern January 2022 – February 2022 Flicker Infotech *Remote, India*

- Gained valuable hands-on experience in web development and contributed to the creation of dynamic and visually appealing user interfaces. Actively collaborated with cross-functional teams to deliver responsive and engaging web applications.

PROJECTS

GAB-UP (Chat Application) | Nodejs, Express, MongoDB, Socket.io ([Github](#))

- The chatting application is a user-friendly and versatile messaging platform that allow users to communicate in real time. It provides seamless chatting experience, enabling users to send messages and engage in group conversations.

COVID-19 TRACKER | React.js, JavaScript, CSS ([Link](#))

- The main purpose of a COVID-19 tracker is to keep the public informed about the status of the pandemic at local, national and global levels.

SECRETS | Nodejs, MongoDB, EJS ([Github](#))

- This application allows users to anonymously share their secrets and thoughts with the community. Users can create accounts, post their secrets, and read secrets shared by others without revealing their identities.
